### GENERAL STATEMENT

#### HISTORICAL

On October 31, 1754, Letters Patent were issued incorporating THE GOVERNORS OF THE COLLEGE OF THE PROVINCE OF NEW YORK IN THE CITY OF NEW YORK IN AMERICA and providing for the establishment of a College to be known as King's College "for the Instruction and Education of Youth in the Learned Languages and in the Liberal Arts and Sciences." The conclusion of the announcement issued in the same year reads: "A serious, virtuous, and industrious Course of Life being first provided for, it is further the Design of this College to instruct and perfect the Youth in the Learned Languages, and in the Arts of Reasoning exactly, of Writing correctly, and Speaking eloquently; and in the Arts of Numbering and Measuring, of Surveying and Navigation, of Geography and History, of Husbandry, Commerce, and Government; and in the Knowledge of all Nature in the Heavens above us, and in the Air, Water, and Earth around us, and the various Kinds of Meteors, Stones, Mines, and Minerals, Plants and Animals, and of every Thing useful for the Comfort, the Convenience, and Elegance of Life, in the chief Manufactures relating to any of these things: And finally, to lead them from the Study of Nature, to the Knowledge of themselves, and of the God of Nature, and their Duty to Him, themselves, and one another; and every Thing that can contribute to their true Happiness, both here and hereafter." The educational work of the College was at once begun under the presidency of Dr. Samuel Johnson with a class of eight students and the first Commencement was held on June 21, 1758. The first college building, erected on a portion of the 'Kings Farm,' at what is now the corner of Park Place and Church Street, was completed in 1760. The Revolutionary War, during which this building was taken for military purposes, compelled a suspension of activities. King's College numbers among its students and graduates Alexander Hamilton, John Jay, Robert D. Livingstone, Gouverneur Morris, and John Stevens.

In 1784, the Legislature of the State of New York passed an act incorporating the 'REGENTS OF THE UNIVERSITY OF THE STATE OF NEW YORK,' vesting the property of King's College in the Regents, and changing the name of the College to Columbia College. In 1787, this act was repealed, and an act was passed, confirming the Royal Charter of 1754, and vesting the property and franchises of King's College in "The Trustees of Columbia College in the City of New York."

In 1810, the charter was again amended in certain particulars at the request of the Trustees, and re-enacted, but the corporate title remained the same until 1912 when by order of the Supreme Court of the State of New York it was changed to 'The Trustees of Columbia University in the City of New York.' In 1897 the University removed from Forty-ninth Street and Madison Avenue, where it had been situated since 1857, to its present location on Morningside Heights.<sup>1</sup>

## BUILDINGS AND GROUNDS

The general plan of the buildings of the Corporation on Morningside Heights comprises two groups, one of which occupies the site on the northerly side of 116th Street, extending to 120th Street, and the other, the site on the southerly side of 116th Street, extending to 114th Street, bounded on the east by Amsterdam Avenue, and on the west by Broadway.<sup>1</sup>

The UNIVERSITY LIBRARY, erected 1895-1897, the gift of Seth Low, LL.D., of the Class of 1870 and President of the University from 1889 to 1901, is the central feature of the buildings comprising the northerly group which together form a large quadrangle. This group includes on the east: EAST HALL, which contains several of the administrative offices of the University; KENT HALL (205 ft. x 53 ft.), erected in 1910 from funds largely provided by Charles Bathgate Beck of the Class of 1877, College, and 1879, Law, occupied by the School of Law and the Faculty of Political Science; PHILOSOPHY HALL (145 ft. x 57 ft.), erected in 1910, the gift of Mrs. Helen Hartley Jenkins, occupied by the Faculty of Philosophy; ST. PAUL'S CHAPEL (140 ft. x 82 ft. x 112 ft., with 1,000 sittings), erected 1904, the gift of Olivia E. P. Stokes and Caroline Phelps Stokes as a memorial to their parents; AVERY LIBRARY (150 ft. x 57 ft.), erected 1911, the gift of Samuel P. Avery, containing the Avery Architectural Library and the School of Architecture; and FAYERWEATHER HALL (150 ft. x 57 ft.), erected in 1896 from the bequest of Daniel B. Fayerweather, occupied by the departments of physics and astronomy. On the north, the group further includes: SCHERMERHORN HALL (205 ft. x 80 ft.), erected 1896, the gift of William C. Schermerhorn of the Class of 1840, occupied by the Departments of geology, mineralogy, botany, agriculture, and zoölogy; the unfinished UNIVERSITY HALL, occupying the central position on the northern boundary of the campus, which contains the offices of the Bursar, Registrar, Dean of the Graduate Schools, Director of University Admissions, and University Extension, and, next to the LIBRARY, the largest of the University buildings, containing the Gymnasium, the power plant, which provides light, heat, and power to all of the buildings, and the University Commons; and HAVEMEYER HALL (205 ft. x 80 ft.), erected 1896, the gift of the family of Frederick Christian Havemeyer, occupied by the School of Chemistry. On the west the northerly group includes: the SCHOOL OF ENGINEERING building (150 ft. x 57 ft.) erected 1896, occupied by the departments of civil, electrical, and mechanical engineering; EARL HALL (99½ ft. x 58 ft.), erected 1900, the gift of William Earl Dodge, the home of the religious, philanthropic, and social interests of the students; the SCHOOL OF MINES building (145 ft. x 57 ft.), erected 1904, the gift of Adolph Lewisohn, used for mining and metallurgy; and the FACULTY CLUB, a building like EAST HALL, acquired by the University at the purchase of the site.

### ORGANIZATION

The title to all corporate property is vested in a board of twenty-four Trustees, whose term of office is for life, and who form a self-perpetuating body, exercising the power of appointment as to all officers of instruction and administration and general oversight and control of the affairs of the University. In 1909 provision was made for the nomination by the Alumni of six of the twenty-four Trustees.

THE PRESIDENT has charge of the educational administration of the University and is Chairman of the University Council and of every faculty and administrative board established by the Trustees. The treasurer of the corporation elected by the Trustees has charge of the financial administration of the University. The other principal administrative officers are the Deans of the several faculties and the Directors of the Summer Session, of University Extension, of the Schools of Architecture, of Journalism, of Business and of Dentistry, who under the general supervision of the President have immediate charge of the educational work of the University, the Provost of the University, the Librarian, the Chaplain, the Comptroller, the Secretary of the University, the Registrar, the Bursar, and the Superintendent of Buildings and Grounds.

THE UNIVERSITY COUNCIL is a representative body consisting of the President, the Deans, certain other administrative officers, and two members elected from each of the several faculties. Subject to the reserved power of control by the Trustees, it is the function of the Council (*a*) to control the award of the higher degrees, to secure the correlation of courses with a view to increase the efficiency and to enlarge the range of University work, to encourage original research, and to adjust all questions involving more than one faculty; (*b*) to make recommendations, both to the Trustees and to the several faculties, concerning the educational administration of the University, and to advise the President upon such matters as he may bring before it; (*c*) to appoint all Fellows and University Scholars and, within the limits of the Statutes, to make rules for their government.

THE FACULTIES of the University are composed of members of the corps of instruction of professorial rank. It is the function of the Faculties (*a*) to fix the requirements of admission, the program of studies, and the conditions of graduation; (*b*) to establish rules for ascertaining the proficiency of students, and for the assignment of honors; and (*c*) to fix the times of graduation. The Faculties, in their turn, are made up of various Departments of Instruction, which in the case of larger Departments have an organization of their own under an administrative head. For purposes of administration the Departments are further grouped together in a number of Divisions.

### SCHOOLS AND COLLEGES

The Schools and Colleges composing the University are as follows:

COLUMBIA COLLEGE, the oldest part of the University and in a sense the mother of the rest, offers a program of studies leading to the degree of Bachelor of Arts. Emphasis is placed upon the quality of the student's work rather than upon the time spent in residence, and this combined with the close coordination of the work of the Summer

Session and University Extension with that of the College, makes it possible for a well-prepared candidate to complete the requirements for the bachelor's degree in three years. The program provides not only for those students who wish to devote their entire time to undergraduate work, but for those who desire during their collegiate residence to prepare themselves for advanced standing in some professional course of study. As a preliminary to any professional courses the University strongly recommends at least two years of collegiate work, and candidates for professional degrees who are not already college graduates are advised to take advantage of the opportunities offered through Columbia College for a combination of general and professional studies which will lead to the bachelor's degree, in addition to a professional degree in law, medicine, mining, engineering, chemistry, or architecture, in six years.

BARNARD COLLEGE, founded in 1889, is a separate corporation and has separate buildings. As an undergraduate college for women, however, it bears the same relation to the educational system of Columbia University as does Columbia College for men. The requirements for admission and the standard of scholarship are of the same grade. The degree of Bachelor of Arts is conferred upon its graduates by the University on the recommendation of the Faculty of Barnard College.

THE GRADUATE FACULTIES of the University, consisting of the coordinated faculties of Political Science, Philosophy, and Pure Science, offer advanced courses of study and opportunities for original research leading primarily to the non-professional degrees of Master of Arts and Doctor of Philosophy.

THE FACULTY OF POLITICAL SCIENCE, established in 1880, in history, economics, social science, government, public law, and comparative jurisprudence.

THE FACULTY OF PHILOSOPHY, established in 1890, in philosophy, education, psychology, anthropology, Greek and Latin, English, comparative literature, the Germanic, the Romance, the Slavonic, and the Oriental languages.

THE FACULTY OF PURE SCIENCE, established in 1892, in mathematics, astronomy, physics, chemistry, mineralogy, geography, geology, zoology, botany, physiology, anatomy, bacteriology, biological chemistry, pathology, and engineering.

THE COLLEGE OF PHYSICIANS AND SURGEONS, founded in 1807, offers courses in the principles and practice of medicine and surgery, leading to the degree of Doctor of Medicine.

THE SCHOOL OF LAW, established in 1858, offers courses of three years and of one year in the principles and practice of private and public law, leading to the degrees of Bachelor and Master of Laws, respectively, and advanced courses of study and opportunities for legal research leading to the degree of Doctor of Law.

THE SCHOOL OF MINES, founded in 1863, offers a three years' course of special professional study in mining and metallurgical engineering, leading to the degrees of Engineer of Mines and Metallurgical Engineer.

THE SCHOOL OF ENGINEERING AND THE SCHOOL OF CHEMISTRY, set off from the School of Mines in 1896, offer a three years' course of special professional study in civil engineering, sanitary engineering, electrical engineering, mechanical engineering, chemical engineering, and industrial engineering, leading to the degrees of Civil Engineer, Electrical Engineer, Mechanical Engineer, Chemical Engineer, and Master of Science in Industrial Engineering.

TEACHERS COLLEGE, founded in 1888 and chartered 1889, was included in the University in 1898. It is a separate corporation, but takes academic rank in the University system as a professional school for teachers. It offers through the Faculty of Education, a course of study leading to the degree of Bachelor of Science in Education and graduate courses in school administration and in secondary, elementary, and kindergarten education, leading to the Teachers College diploma and the doctor's and master's degrees. Through its faculty of Practical Arts the College offers a four-year program of collegiate study, based on four years of high school work, leading to the

degree of Bachelor of Science in Practical Arts, uniting liberal education in the fundamental cultural subjects with technical training in household arts, fine arts, industrial arts, music, physical education, and nursing and health; and graduate courses leading to the Teachers College diploma and the doctor's and master's degrees.

THE COLLEGE OF PHARMACY, incorporated in 1831 and affiliated with Columbia University in 1904, is, similarly, a separate corporation. It offers University courses leading to the degrees of Pharmaceutical Chemist, Bachelor of Science in Pharmacy, and Doctor of Pharmacy.

THE SCHOOL OF JOURNALISM, founded in 1912 through the gift of the late Joseph Pulitzer, offers courses in letters, science, and practical Journalism leading to the degree of Bachelor of Literature in Journalism and advanced courses leading to the degree of Master of Science.

THE SCHOOL OF ARCHITECTURE, founded as a department in 1896 and as a separate School in 1914, offers courses of study leading to the degree of Bachelor of Architecture, and advanced courses leading to the degree of Master of Science.

THE SCHOOL OF BUSINESS, organized in 1915, offers courses of study and technical and professional instruction in accounting, finance, and various branches of business leading to the degree of Bachelor of Science in Business, and advanced courses leading to the degree of Master of Science.

THE SCHOOL OF DENTISTRY, organized in 1917, offers courses in Dentistry and Oral Hygiene leading to the degree of Doctor of Dental Surgery.

The University maintains a SUMMER SESSION, established in 1900, of six weeks' duration, in which are offered courses that are accepted in partial fulfillment of the requirements of certain academic degrees and diplomas.

Through its system of UNIVERSITY EXTENSION, begun in 1910, the University offers to men and women, especially to those engaged in teaching, who can give only a portion of their time to study, an opportunity to pursue subjects included in a liberal education and to take courses, if they so desire, toward a diploma or an academic degree. HOME STUDY courses, begun in 1919, are also offered to persons who are unable to take work in residence.

In the interest of mature students the University adopted in October, 1920, a plan, whereby the work of the University in its several divisions is made more fully accessible to properly qualified students who may be candidates for a bachelor's degree, but whose needs are not fully met by the provisions of the undergraduate colleges. Such students are designated "UNIVERSITY UNDERGRADUATES," as distinguished from college undergraduates and from graduate students. They must comply fully with the requirements for admission for Columbia College (or in the case of women, for Barnard College). Evidences of maturity may be the age of twenty-one years or more, the satisfactory completion of two or more years of college work elsewhere, special proficiency in some study, etc. They may, with permission, take work in Columbia College, and with certain restrictions, in the Summer Session and in University Extension. Provided they are entitled to senior standing, they may take certain courses offered by the Faculties of Political Science, Philosophy and Pure Science. On completing the requirements provided for such students, they will be granted the degree of Bachelor of Science in General Studies on the recommendation of the University Council. Students who desire to do graduate work but whose previous education does not entitle them to full graduate standing will frequently find it advantageous to enter as University Undergraduates. This applies to most students coming from foreign countries.

### ANNOUNCEMENTS

The *Announcements* of each College or School, of the Summer Session, of University Extension and of the several Divisions, may be obtained without charge from the Secretary of the University.

# GENERAL REGULATIONS

## STATUS OF STUDENTS

A student may enter Columbia University as either:

1. A matriculated student, accepted by the University as having fulfilled the preliminary qualifications for candidacy for a degree, certificate of proficiency, or diploma. A period of regular attendance upon all stated academic exercises amounting to at least one academic year must be completed by each such candidate; or
2. A non-matriculated student, permitted to attend such courses as he may be qualified to take, but not regarded as a candidate for a degree, certificate of proficiency, or diploma.

In the *Announcement* of each faculty will be found the conditions governing admissions to courses under that faculty.

Under the Statutes every student is admitted subject to the disciplinary powers of the University authorities. The President is empowered to administer discipline and to authorize the Deans of the several faculties to do so on his behalf.

Students prevented by conscientious scruples from complying with academic requirements which may be fulfilled only upon days set apart by their church for religious observance should make application to the appropriate authority for equitable relief.

## REGISTRATION

Before attending any University exercise each student must register, *i. e.*, must present himself in person to furnish the information necessary for the University records and to file a statement of the courses he is authorized to pursue. The central office of the Registrar, University Hall, and the offices at the College of Physicians and Surgeons and the School of Dentistry, 437 West 59th Street, at the College of Pharmacy, 115 West 68th Street, are open for registration on the dates for registration given in the "Academic Calendar" (see Index). Students unable to complete their registration on the required date may file a provisional statement within the statutory period. Students registering late are charged an additional fee of six dollars and are held accountable for absences thus incurred. Registration cannot be completed until the fees for the Session have been paid.

Students holding fellowships or scholarships are required to register not later than the date specified in the Academic Calendar; failure to do so may be considered as vacating the fellowship or scholarship.

The requirements for graduation may be completed at any time during the year, but diplomas are issued only at Commencement and under date of the last Wednesday in October and February, respectively.

*Withdrawal.* An honorable discharge is granted to any adult student in good standing who may desire to withdraw from the University; a minor must submit the written assent of his parent or guardian. Students withdrawing from the University are required to notify the Registrar. No application for a return of fees can be considered unless written notice be given at the time of withdrawal. The Dean of any faculty may, for reasons of weight, grant a leave of absence to a student in good standing.

*Late Registration.* For the ultimate date for the completion of registration without the payment of the additional fee, see the Academic Calendar.

*Late Application.* For the ultimate date for filing an application for admission, a deficiency or a special examination, or for a degree, without the payment of the additional fee, see the Academic Calendar.

*Deficiency and Special Examination.* An examination to remove a deficiency in course or in entrance requirements, or an examination at an unusual time, involves the payment of the additional fee.

When a rebate is allowed for the discontinuance of courses or withdrawal from the University, such rebate will be reckoned from the day upon which the Registrar receives notice from the student.

*Summer Courses in Surveying, Mining, and Geodesy.* Students taking courses in Surveying and Geodesy in the Summer Session at Camp Columbia are required to pay a university fee of \$6 and tuition fees for each course. The university fee is payable but once for each session and allows a student to take any course or courses given during that session for which he is otherwise eligible. The tuition fees are estimated at \$8 per point.

Candidates for admission to advanced standing who attend the Summer Course in Practical Mining are required to pay therefor a fee of \$50.

## DEPOSITS

*Summer Courses in Surveying.* Every student before starting for Camp, and at the same time the fees for the Summer Session in surveying are paid, shall make a deposit at the Bursar's office at Columbia University to meet Camp expenses, *viz.*, board, laundry, charges for drawing material, notebooks, etc.; also to cover any damage to, breakage, or loss of instruments or Camp equipment, and transportation of self and baggage from the station to and from the Camp. The Bursar's receipt for said deposit shall be presented to the professor in charge of the Summer Session upon the arrival of the student in Camp.

The amount of the deposit varies with the course or the number of courses taken and is as specified below. Students intending to take two or more courses shall deposit an amount equal to the sum total of the deposits herein specified for the respective courses. A check for the balance of the deposit which shall remain to the credit of the student after his withdrawal from the session will be given to him payable upon application to the Bursar of Columbia University. In case the total charges exceed the deposit the student will be subject to an additional assessment.

The deposit for C.E. 15S is \$50; for C.E. 25S, \$50; for C.E. 26S, \$25; for C.E. 26aS, \$30; for C.E. 27S, \$50; for C.E. 28S, \$30; for C.E., 29S, \$35; and for Geodesy 107, \$30.

The deposit for any one *survey* of Course 15, 25, or 27 is \$15.

*Apparatus, Supplies, and Keys to Desks and Lockers.* A deposit for the use of lockers, keys, apparatus, material, and the like, is required of students in certain schools and courses. At the end of the academic year each student will be credited with those articles which he returns in good order, and the value of those he has injured or broken will be deducted from his deposit. Details may be obtained from the Bursar.

## DEPOSITORY FOR STUDENTS FUNDS

For the convenience and protection of students while in residence at the University, the Bursar is prepared to receive funds for deposit, subject to the printed rules and regulations, copies of which may be obtained at his office upon request. There is no charge for this service other than the exchange of out-of-town checks and drafts.

Personal checks will not be cashed by the University or credit allowed until the money has actually been received from the bank on which the check is drawn. New York drafts, money orders, and travellers' checks may be deposited for collection and withdrawals allowed when the cash is received. Students should provide themselves preferably with money orders, bank drafts on New York, or travellers' checks for the amount of their expenses, and are advised to open an account with the University on registration.

## EMPLOYMENT FOR STUDENTS

The University endeavors through the Secretary of Appointments to give to students who need it the opportunity to earn enough for partial support, and to extend assistance in other ways.

Preference is naturally given, in case of a choice of applicants, to those who, as strangers in New York, are not likely to hear of positions through other channels.

No prospective student should come to Columbia expecting to depend entirely or even largely upon the assistance of the University, and every student should be prepared to meet at least the expenses of the first half-year—say, \$500.

Communications relating to above should be addressed to the Secretary of Appointments, Room 305 East Hall.

## APPOINTMENTS WORK

The appointments work of Columbia University is divided between two branches: one having headquarters at Columbia University, the other at Teachers College.

The duty of these offices is to assist competent graduates of the University to obtain suitable permanent employment.

Both offices will be glad to be informed promptly of present or prospective vacancies in positions for which college-trained men or women are eligible.

No fee is charged for any services rendered.

The Appointments Office at Columbia University keeps classified lists of those who wish employment in business, in law offices, along social service or public lines, or in technical branches; also in teaching positions in colleges and universities, except those in Education. Communications relating to above should be addressed to the Secretary of Appointments, Room 305 East Hall.

The Bureau of Educational Service at Teachers College keeps classified lists of those who desire administrative, supervisory, and teaching positions in normal, secondary, and elementary schools, kindergartens, and hospitals, and for college and university positions in the teaching of Education; that is to say, for any position specific preparation for which is made in Teachers College. Communications should be addressed to the Director of the Bureau, Mr. Rollo G. Reynolds, Teachers College.

## FELLOWSHIPS, SCHOLARSHIPS AND PRIZES

(See Table of Contents.)

RELATIONS BETWEEN THE UNIVERSITY AND OTHER  
INSTITUTIONS

The educational opportunities of students in Columbia University (including Barnard College, Teachers College, and the New York College of Pharmacy) are increased by the close relations of the University with other institutions of instruction and research.

*Museum of Natural History.* The American Museum of Natural History places its collections at the service of advanced students of Columbia University for the purpose of study and research, and provides them with the necessary facilities for work.

*Metropolitan Museum of Art.* The Metropolitan Museum of Art admits students of

Columbia University on presentation of cards of introduction from the University, and gives them special facilities for the study of the objects in the Museum.

*New York Botanical Garden.* Columbia University has the privilege of conducting university courses in botany at the New York Botanical Garden and of using its laboratories and floral material, and all courses of instruction given there are open to officers and students of the University without charge. The Director is a member of the Faculty of Pure Science. For a description of the equipment of the Botanical Garden, see the statement of the Department of Botany.

*Theological Seminaries.* The Union Theological Seminary and the General Theological Seminary, both of which are represented on the University Council, admit students of high standing in the University to certain lectures in their regular or special courses. Libraries of the Seminaries, for reference, are open to all qualified students of the University. Reciprocal advantages are offered by the University to students of the Seminaries who are qualified to register as candidates for the higher degrees. The General Theological Seminary offers a scholarship to graduates of Columbia College.

The University also enjoys reciprocal arrangements with the theological seminaries in the vicinity of New York: the Jewish Theological Seminary (New York), Drew Theological Seminary (Madison, N. J.), St. Joseph's Theological Seminary (Yonkers, N. Y.), the New Brunswick (N. J.) Theological Seminary, and the German Theological Seminary (Bloomfield, N. J.).

The Director of the New York School of Social Work is a professor in the University, and the same reciprocal advantages for students exist as in the case of the theological seminaries.

*Hospitals.* Besides the Vanderbilt Clinic and the Sloane Hospital for Women, the general and special hospitals of New York afford important fields for clinical teaching. The College of Physicians and Surgeons is in close alliance with the Presbyterian Hospital, and is strongly represented on the staff of many other institutions, and regular clinical instruction at hospitals is made a prominent feature of the program. In many of these hospitals the fourth-year students are admitted as clinical clerks to serve on the house staff.

*Other Institutions.* There are close informal relations between the University and the Hispanic Society of America, the Rockefeller Institute of Medical Research, the New York Zoological Garden, the New York Aquarium, and the laboratories at Wood's Hole and Cold Spring Harbor. (For the Libraries of the City, see below.)

## THE LIBRARY

The Library contains about 835,000 volumes, exclusive of unbound pamphlets and duplicates, and some 45,000 doctoral dissertations.

Among the notable special collections may be mentioned the Phoenix Library, consisting of 7,000 volumes, the gift of Stephen Whitney Phoenix, of the Class of 1859; the Avery Architectural Library, a collection of about 26,000 volumes relating to architecture and decorative art; the valuable Townsend Library of National, State, and Individual War Records; Temple Emanu-el Library of Biblical and Rabbinical literature; Garden Library of Southern Americana; Holland Society Library (including a Grotius collection), Goethe collection, Kant collection, Mary Queen of Scots collection, special collections on the French Revolution, Jeanne d'Arc, anarchism, the drama, (including a Dramatic Museum of stage models), Rumanian literature, music, and a collection of contemporary French literature at the Maison Française. The Library is also the depository for the Reform Club of the City of New York.

*Reading-rooms.* About 15,000 carefully selected reference books and many of the most important works on all subjects, in standard editions, representing the leading

authors in all literatures, are placed in the general reading-room directly accessible to all authorized readers. On the same floor, in the north wing, is the periodical reading-room, where are shelved many bound volumes of periodicals, and the current numbers of government documents and periodicals.

For the convenience of undergraduates of Columbia College, there is in Hamilton Hall a College Study containing a reference library of more than ten thousand carefully selected volumes.

Connected with the stacks in which are stored the books relating especially to Philosophy, Literature, the Languages, the Sociological and Economic Sciences and History, are twenty special study-rooms, open only to authorized readers, which afford to advanced students and investigators in these fields opportunity to carry on their work in quiet rooms in the immediate vicinity of the literature of the subjects under consideration. The various departments of instruction have special libraries in close connection with their laboratories and lecture-rooms.

The Law Library, the Bryson Library of Teachers College, which is the Educational Library of the University, and the carefully selected reference libraries of Barnard College, the College of Physicians and Surgeons, and the College of Pharmacy, are all available to officers and students of the University. Nearly all of the more private or restricted libraries of the city, such as those of the learned societies, are open to officers and to advanced students introduced by the Librarian of the University.

In the basement of the Library, the New York Public Library maintains a branch of its circulation department. The collection contains about 4,000 volumes and 80,000 additional titles are available through the Interbranch Loan System.

By the courtesy of the trustees of Union Theological Seminary the reading-room of that institution is open to students of the University.

*Catalogues.* The general catalogue of the Library is a record of all books, with the exception of the special collections in Law and Medicine, in the possession of the University. In addition to this there are catalogues of department libraries located in department reading-rooms, and a union catalogue which is a record, by authors only, of books not possessed by the University which may be found in the Library of Congress, John Crerar Library, Harvard University, and other libraries.

*Use of the Library.* All officers, students, and graduates of the University have free access to the Library and may draw books for home use. For further information, consult the *Readers' Manual and Library Rules*.

Officers of New York University, of the College of the City of New York, of Hunter College, of the Metropolitan Museum of Art, of the American Museum of Natural History, and principals and heads of departments of the New York High Schools, are granted the same Library privileges as are extended to graduates of Columbia University.

Persons of mature years desiring to engage in definite research which cannot be successfully conducted in the Public or other libraries of this city will be given the privilege of using this library in the building, upon filing a satisfactory application, responsibly indorsed. Blank applications will be furnished by the Librarian on request.

The Library is open each week-day (except Labor Day, Thanksgiving, Christmas, New Year's Day, Good Friday, and Independence Day) from 8:30 a. m. until 10 p. m., during the Winter, Spring, and Summer Sessions of the University; and from 8:30 a. m. to 6 p. m. at other times.

### BOOK STORE

A University book store is maintained in the basement of the School of Journalism building under the auspices of the Columbia University Press, where officers and students may purchase books and stationery at stated discounts from list prices.

## THE GYMNASIUM

(See "Equipment" under Physical Education departmental statement)

## UNIVERSITY COMMONS

The University Commons, in University Hall, is operated under University supervision for the benefit of officers and students.

## RESIDENCE HALLS

*For Men.* There are three University residence halls on South Field, with accommodations for, approximately, 820 men; Hartley Hall, the gift of Mrs. Helen Hartley Jenkins and Marcellus Hartley Dodge, '05, in memory of the late Marcellus Hartley; Livingston Hall, named in memory of Robert R. Livingston, of the Class of 1765; and Furnald Hall, provided for in the will of the late Francis P. Furnald, in memory of his son, Royal Blackler Furnald, a member of the Class of 1901. Each building is ten stories in height exclusive of basement, and 137 feet long by 64 feet wide. They are lighted by electricity and heated by steam, and have telephone and electric elevator service.

The Halls are built of stone and overburned bricks. The floors and partitions are of the reinforced concrete type, and the construction is considered thoroughly fire-resistant throughout.

Hartley and Livingston each contain 300 rooms, the average size of the bedrooms being 8' 4" x 14' 6" and of the studies 10' 6" x 14'. Furnald contains 294 rooms, the average size of bedrooms being 9' 0" x 14' 9" and of the studies 11' 6" x 13' 6". All the rooms have outside light and exposure, and the arrangement permits of flexibility in renting rooms in suites. There are also several double rooms. All ceilings are nine feet high. Each bedroom has a clothes closet and enameled basin with hot and cold running water. The rooms are provided with heavy oak furniture of mission type. There are four shower baths on each floor. All the water used in the Halls is filtered. The entrance for students to each Hall is from the campus, and leads directly into a large assembly room sixty feet square. This room runs up through two stories and has a large open fireplace opposite the entrance. It is furnished in heavy leather-covered oak. At one side of the main entrance is the office of the Hall, and on the other a reception-room. In the basement is space for trunk storage. Well-equipped infirmaries are provided in the Residence Halls. Rentals range from \$135 for single rooms to \$400 for three-room suites for the period between the Monday preceding the opening of the Winter Session and the Saturday after Commencement.

The Residence Halls are under the supervision of an Advisory Committee appointed by the President and consisting of four University officers and one student resident. The Advisory Committee is assisted by committees made up of residents in the Halls.

A pamphlet containing floor-plans, charges, and the Hall Regulations may be had upon application to the Secretary of the University. Hartley and Livingston Halls are, by vote of the Trustees, reserved primarily for undergraduates in Columbia College.

*For Women.* Brooks and John Jay Halls, the residence halls for Barnard College students, accommodate about 180 students. Full information in regard to the situation and cost of rooms, the advance of deposit, the charge for electric light, and the residence scholarship is published in a separate pamphlet, to be had on application to the Secretary of Barnard College.

Two houses on Claremont Avenue, Gouverneur Morris Hall and Tompkins Hall, are open to women with accommodations, when present leases expire, for 300 residents. About half the space is now available.

Whittier, Seth Low and Bancroft Halls, the dormitories of Teachers College, have accommodations for about 980 women. Inquiries regarding rooms, board, and the like should be addressed to the Controller of Teachers College.

*Other Accommodations.* Besides these dormitories, there are many good boarding-houses and apartments near the University. The careful selection, inspection, and registration of such lodgings have been undertaken, and a card-catalogue of lodgings is kept in the Residence Bureau in Philosophy Hall. Many of the Greek-letter fraternities maintain chapter houses near the University.

## PUBLIC WORSHIP AND RELIGIOUS WORK

Service in St. Paul's Chapel, at which attendance is voluntary, is held at noon, every week-day during the academic year, except Saturday. Service on Sunday, with address by the Chaplain or by a visiting University preacher, is at 4 o'clock. Organ recitals are also frequently given.

The Chaplain holds hours for consultation after daily chapel service and also in the afternoon at Earl Hall. The Chaplain's house is in close proximity to the campus.

Barnard College and Teachers College hold separate services twice a week in their respective chapels.

## EARL HALL

Earl Hall, the home of the religious, philanthropic, and social organizations and interests of the University, is open from 8:30 a. m. to 10 p. m. daily to all students without expense, under the direct management of the Director of Earl Hall, who is also Secretary of the University Young Men's Christian Association.

The building may not be used for distinctly dogmatic or denominational religious teaching, but all organizations, the objects of which are to promote the religious and philanthropic life of their student members and of the student body at large, have the privilege of using it for their meetings. While the social purposes of the Hall are necessarily subordinated to the other uses of the building, the Secretary desires to promote the same type of informal personal and social intercourse that prevails in a good club. Provision for the regular meetings of student organizations is made on a day-and-hour schedule, without exclusive use of any of the rooms, in the following order: societies the purpose of which is (1) primarily religious; (2) primarily philanthropic; (3) primarily literary; and (4) miscellaneous student organizations.

The Secretary of the Young Men's Christian Association, the Chaplain of the University, and the University Medical Officer have offices in this building.

## MEDICAL ATTENDANCE

The University Medical Officer, Dr. McCastline, has direct supervision of all matters affecting the health of the student body. All cases of illness, especially communicable diseases, must be promptly reported to him. Absence from classes due to illness must also be reported to his office. Dr. McCastline, as University Physician, and the members of his staff hold office hours daily in Earl Hall for consultation with students.

Members of the University who need medical attention at home, and who desire to be advised concerning private physicians, specialists and nursing care, will receive such information upon applying at the office of the University Physician.

## STUDENT ORGANIZATIONS

The various student organizations, while self-governing, are subject to the following regulations: The schedules of public contests and performances must be approved by

the University Committee on Student Organizations; budgets for expenditure are approved and checked by the Comptroller; the University Committee on Athletics, consisting of three graduates, three students, and three University officers, adopt and administer rules of eligibility not involving questions of scholarship and govern participation in intercollegiate athletics. Provision is made for the election each year by the student body at large of a Board of Student Representatives.

The Columbia University Athletic Association was organized in 1909 for the purpose of formulating and maintaining a general athletic policy at Columbia. The annual dues are fifteen dollars, entitling members to free admission at all home games and also to the use of the Gould Boat House.

King's Crown is an organization aiming to do for non-athletic activities what the athletic association does for athletics. The annual dues are ten dollars, entitling members, among other privileges, to discount from the prices of subscriptions to publications and admission to non-athletic performances.

### GREEK-LETTER FRATERNITIES

The following Greek-letter fraternities, given in the order of their establishment, maintain chapters at Columbia University: Alpha Delta Phi; Psi Upsilon; Delta Phi; Delta Psi; Phi Kappa Sigma; Phi Gamma Delta; Phi Kappa Psi; Delta Kappa Epsilon; Zeta Psi; Beta Theta Pi; Delta Tau Delta; Theta Delta Chi; Phi Delta Theta; Delta Upsilon; Sigma Chi; Sigma Alpha Epsilon; Pi Lambda Phi; Phi Sigma Kappa; Theta Xi; Alpha Chi Rho; Zeta Beta Tau; Phi Epsilon Pi; Sigma Nu; Phi Sigma Delta; Alpha Sigma Phi; Tau Epsilon Phi; Sigma Alpha Mu; Phi Beta Delta; Alpha Phi Delta; Kappa Nu; Omicron Alpha Tau; Tau Delta Phi; Beta Sigma Rho; Delta Beta Phi.

# DIVISIONAL AND DEPARTMENTAL STATEMENTS

## INTRODUCTORY

The courses of instruction are numbered in accordance with a plan uniform throughout the University, and attention is called to the following information which the number assigned to a course will in each case indicate.

Odd numbers indicate the Winter Session, even numbers the Spring Session of the academic year. Courses designated 1-2, 23-24, etc., run through the Winter and Spring Sessions beginning in the Winter Session; those designated 24-25, etc., begin in the Spring Session. Courses numbered between 1 and 100 are, in general, elementary and may not be offered in fulfillment of the requirements for the higher degrees (Masters, Doctors, and Professional Degrees). Courses numbered from 101-200 are primarily for students who hold a first degree, but are open to undergraduates who have completed 64 points (for courses in Law, 94 points), including all prescribed work. In general, no such course may be taken without some elementary training in the same or in some allied subject. Courses from 201-300 are restricted to such graduate students as are qualified to pursue the work to advantage. Seminars are numbered from 301 up. Attention is called to the current *Announcement of the Faculties of Political Science, Philosophy, and Pure Science*, and particularly to the fact that the requirements for the degrees of Master of Arts, Master of Science, and Doctor of Philosophy are based upon subjects, and not upon courses. Students should consult the officers of instruction and administration concerned with regard to their selection of courses before registration.

Credit for courses is given in terms of points. Hours indicated are for a Winter or Spring Session.

Home Study courses cannot be counted for academic credit in any department of the University.

Any subject of study not appearing in its alphabetical order may be found through the index.

With the exception of the courses in law and engineering the University is open to women in all of its various branches.

Students should note the distinction between a department and a school. For instance, there are Departments of Civil, Electrical, and Mechanical Engineering and a School of Engineering. The departmental statements which follow have to do only with the giving of the instruction and the opportunities for research in each special branch of study. The information as to the conditions of admission to the courses and the academic credit to be received therefor, will be found under the information relating to Colleges and Schools which follows the Departmental Statements, and in the separately printed *Announcements*.

It is not possible, within the limits of this volume, to give more than the briefest outline of the courses. In the appropriate *Bulletin of Information* published by the University, and distributed without charge upon application to the Secretary, a detailed statement will be found of the scope of each course, the manner of treatment, the courses requisite, and the like.

#### SUMMER SESSION (1922)

5101—Histology. General histology, histogenesis, microscopic anatomy, and organogenesis. Conferences and laboratory exercises. 6 points. Professor ELWYN.

*Equipment.* The laboratory facilities of the department are very complete. The large general dissecting-room accommodates from 390 to 546 students, working in groups of five or seven at one table.

The laboratory for advanced morphological research occupies the third story of the anatomical building. Opportunity for advanced work and investigation is here offered to properly qualified students. The established connections of the department furnish abundant human and comparative material both mature and embryonal. The private library of the Professor of Anatomy is at the disposal of advanced workers.

The Museum of Human and Comparative Anatomy and Embryology is designed to present a view from the morphogenetic standpoint of the evolution of the forms of vertebrate life, of their natural relations, both in series of zoological groups and in the comparative and relative positions of organs and system. The material therein contained forms the basis for the demonstrative teaching of the department and is largely drawn upon for illustration of the courses. It is supplemented by the preparations of the embryological collection, containing over 1,000 series of mammalian embryos and over 500 original reconstructions based thereon.

A collection of over 4,000 lantern slides renders both the comparative and embryological collections readily available for rapid review and detailed demonstration and is extensively employed in illustrations of the courses.

*Equipment.* The School of Architecture occupies four complete floors in Avery Hall. The provision of rooms for lectures, drawing, drafting, and study is ample, and the drafting-rooms on the upper floor are well lighted and convenient. One room is set aside for the study of books and photographs, and there is a large exhibition room for Design and other current work.

The Avery Architectural Library, consisting of about 25,000 volumes relating to architecture and allied arts, occupies the ground floor of the building. It is open to the public daily (except Sundays and holidays) from 9 a. m. to 10 p. m. Its abundance of material is available for purposes of study and illustration in the School.

In addition to this the School possesses, in its own departmental library, a collection of about 18,000 photographs and several hundred books, a classified library of many thousands of prints and plates, and a large number of original drawings, including examples of architectural draftsmanship from the Ecole des Beaux-Arts at Paris and from many other sources. A collection of about 16,000 lantern slides is in daily use for illustrating lectures on the history and theory of architecture, painting and sculpture, on ornament and the allied arts, as well as landscape and civic design. The School also possesses a valuable collection of casts for use in the drawing-rooms and for general illustrative purposes. The illustrative material on construction and architectural engineering is also extensive, comprising a large variety of building materials and appliances and a number of structural models especially prepared for the School.

*Equipment.* In Havemeyer Hall the Chemical Engineering Department is provided with space for its museum, lecture-rooms, and laboratories, and every convenience

has been furnished for both the instructors and students working in the general or special courses.

The Chandler Museum of General Inorganic and Organic Chemistry and of the Chemical Arts, a large room occupying the whole left wing of the ground floor, contains the elements and all their more important compounds, inorganic and organic; materials and products illustrating the chemical arts and numerous models, pictures and diagrams.

The Laboratory of Chemical Engineering for the instruction of students in practical application and the solution of problems in connection with the chemical industries is equipped for the manufacture of pure chemicals from their raw materials on a large scale, with batteries of steam evaporators, and with stills, centrifugals, filter presses, crushers, vacuum dryers, multiple effect evaporators, and general apparatus for industrial research.

The Laboratory for Applied Electrochemistry is equipped with special motor-dynamos, one of which furnishes direct current at low voltages to the students' desks for general electrolytic work; the other provides heavy alternating current to the electric furnace room; this room is furnished with all appliances for electric furnace work. The students' desks are fitted with special switchboards and measuring instruments, and the laboratory has been arranged for carrying on research work in all branches of electrochemistry.

The Furnace Room includes standard types of pot furnaces, muffle furnaces, oven furnaces, and a rotary furnace equipped with an automatic heat control device. This apparatus taken in conjunction with the electric furnaces covers a wide range of heating operations.

The equipment of the Laboratory for Engineering Chemistry includes standard types of apparatus for industrial water analysis and treatment, solid, liquid, and gaseous fuel analysis, petroleum distillation, examination and testing of lubricants, cement, asphalt, paper, coal grinding and sampling, gas and fuel calorimetry.

The Chemical Library in Havemeyer Hall is supplied with an extensive collection of books on chemistry and chemical engineering, and is open from 9 a. m. to 5 p. m. and during the sessions of the University from 8 to 10 p. m.

During the year the following additional special lectures were given for the benefit of the students in Chemical Engineering: C. L. Bryden—Methods of Filtration; S. C. Mastick—Chemical Patent Law; A. C. Langmuir—Glycerine Refining and Plant Problems connected therewith.

\*eY1-Y2—Plain and reinforced concrete construction. 6 points. Professor FINCH and assistant.

*Equipment.* The instruction offered by the department consists not only of lectures, recitations and conferences but is also amply illustrated by actual field practice in surveying, by practical design work in the drafting room, and by work in the laboratories both of this department and those conducted by the departments of electrical and mechanical engineering.

The field practice in surveying is given at the Summer School of Surveying, established in 1884 and known as Camp Columbia. The Camp has for some time been permanently located at Lakeside on Bantam Lake near Litchfield, Connecticut. Here the University owns almost a square mile of land which is used only for the purposes of the school and is fully equipped with dormitories, mess hall, and other buildings. The location is ideal, on high ground in country noted for its healthy climate and admirably suited to all surveying operations. The instrumental equipment is exceptionally complete consisting of transits, levels, theodolites, and all other necessary instruments for all kinds of plane surveying including hydrographic and railway and also for geodetic operations. The work is conducted in a thoroughly practical manner and the methods and standards are those of the best of modern surveying practice.

The drafting rooms of the department are located in the engineering building and here the practical design work and application of theory to the solution of the problems of the civil engineer are carried out. Photographs and detailed plans of engineering works are available for study and analysis.

The laboratories of the department are located on the ground floor and in the basement of the Engineering and Philosophy buildings. They are completely equipped with modern apparatus and are used for practical instruction in the testing and behavior of structural materials, highway materials, cements and concretes. Furthermore, the commercial investigations and research work constantly carried on by trained investi-

gators in these laboratories not only keep the work of the department in close touch with the practical problems of engineering, but also bring these problems to the student's attention and stimulate his interest in the subject and in the ways and means adopted in meeting difficulties of construction.

*Equipment.* The library facilities are unexcelled. Every journal of importance, American or foreign, dealing with economics or social science, is taken regularly by the Library. Any book needed by advanced students can usually be secured at once. The special library of history and political science alone comprises more than 80,000 volumes.

The facilities offered to students of sociology and social economy include a large library of general and special works on sociological theory, the history of the family, pauperism, crime, and penology. Arrangements have been made with the Charity Organization Society, the State Charities Aid Association, the University Settlement, the East Side House, and the Brooklyn Bureau of Charities, by which students can become fully acquainted with actual work among the people and with the most perfect methods.

Students of economics and social science will find in New York unrivaled library facilities. In addition to the University, there are the New York Public Library on the Astor, Lenox and Tilden foundations, New York Historical Library, Long Island Historical Library, Library of the New York School of Social Work, the Bar Association Library, and the Law Institute Library, to each of which students have access under favorable conditions. Advanced students also have at their disposal the library of the McVickar Professor of Political Economy which contains an important collection of works on early economics.

The Statistical Laboratory, conducted by Professor CHADDOCK, is equipped with the most modern devices for facilitating statistical work, including the Hollerith punching, sorting, and tabulating machines, Burroughs adding machines, and several calculators of the Brunsviga and Millionaire types, calculating tables, and materials and devices for the construction of graphs. Some of the most necessary current sources of statistical data both for our own and for foreign countries, are kept upon the shelves for reference and instruction.

Students also have the privilege of attending all of the courses in the School of Social Work conducted by the Charity Organization Society.

*Equipment.* The Geological Laboratories, lecture-rooms and museum are found in Schermerhorn Hall. They contain the collections and laboratory in invertebrate palaeontology and stratigraphic geology, the collections in economic and inorganic geology, and the departmental library. The laboratory in 402 contains collections illustrative of the different kinds of rocks which are adapted to conferences in the course in general geology. There is also a much larger series of rocks, embracing nearly all the rare species and structures, which is used for advanced work in microscopic petrography and petrology. Parallel series of thin sections of these are provided, as are microscopes and other necessary apparatus for study, instruction and investigation.

There are study collections in 101 accessible to the students, which illustrate the various geological formations and index fossils, and which are used in the lectures and conferences on stratigraphical and historical geology. A very complete series illustrating the ore deposits, associated geological formations, and useful minerals of North America housed in 301 is similarly employed in the lectures on economic geology.

For the physiographic work and for such geographic work as is given as a part of the service of this department a large collection of mounted maps, including grouped sheets of various state and national surveys, is used. An excellent series of large wall maps and most of the sheets of the different countries of Central Europe are now available. Topographic and geologic maps of other foreign countries are being added as opportunity offers. A classified series of mounted photographs of landforms, accompanied by descriptive text, is made the basis of a part of the laboratory study.

The collection of fossil fishes is now deposited in the American Museum of Natural History.

The collections in fossil botany and the paleobotanical books belonging to the University are now deposited in the New York Botanical Garden, where the instruction in this branch is given.

By arrangement with the American Museum of Natural History, advanced students in the University receive special privileges in its collections, which contain a wealth of geological and palaeontological material specially adapted to comparative studies in connection with investigations.

The work of the students in the college courses in Mineralogy is performed in the Egleston Museum, in the blowpipe laboratory, and in the adjoining conference room, in which are student collections of crystal models and minerals, and several thousand unlabeled specimens used in determinative work. The department possesses, also,

about 1,200 sections of minerals and rocks, 1,500 crystal models in wood and glass. Students in optical mineralogy and in Course 117 use the Eggleston Museum, and for crystal measurements and monochromatic light determination there is provided a large dark-room.

The department has a very serviceable working library and reference reading room with a librarian in constant attendance. The combined equipment of this kind in all branches of the department is represented by about 7,500 volumes and includes all texts, reports and special publications except some of the rarer or older volumes. The standard periodicals are kept on file.

*Equipment.* The University Library offers excellent facilities for the study of German, both on the literary and the linguistic side. The Scandinavian collection contains a good representation of the ancient saga and poetical literature, and many of the eminent writers of modern Norway, Denmark, and Sweden. The Holland Society library, deposited with the University in 1901, contains a considerable collection of books and pamphlets in the Dutch language from all periods.

The Library has sets and the current numbers of all the important periodicals which deal with Germanic literature and Germanic and general philology. It also has sets of periodicals no longer published, and a large collection of the transactions and publications of the learned societies of America and Europe.

Departmental equipment includes the Tombo Memorial Library, consisting of about 2,000 works in modern and contemporary German literature, and a reference library of several thousand volumes containing the most important material for the critical study of the Germanic languages and literatures. This is in part the gift of Mrs. Calvin Thomas and is independent of the main collection in the University Library. Both collections are placed in the two rooms adjacent to the lecture-room and offices of the department in Philosophy Hall. A similar library of about 1,500 volumes, largely from the bequest of William Addison Hervey, is maintained in Hamilton Hall for the use of advanced college students.

The income of the Carl Schurz Library Fund (\$10,000), contributed by citizens of New York in commemoration of the seventieth birthday of Carl Schurz, is, by the terms of the gift, devoted in perpetuity to the purchase of books in the field of the German language and literature.

For the Carl Schurz Fellowship in the German Language and Literature, see Index.

*Germanic Club.* The Germanic Club is an organization founded in 1902 for the purpose of reviewing and discussing important contributions to recent scholarship in the Germanic field. The Club consists of the officers, fellows, and scholars of the department. Meetings are held monthly.

*Equipment.* The General Library is unusually rich in early and rare editions of the Classics, and contains also an excellent selection of recent works on the Latin and Greek languages and literatures and on classical philology in general. The departments of archaeology, epigraphy, palæography, Roman history, and Roman law are especially well represented. The library receives all the important serial publications issued abroad and at home, in the fields of philology and archaeology. The Avery Library contains a large number of illustrated works on art and archaeology as well as on architecture and offers an unusual opportunity for the study of these subjects. Furthermore, in the Drisler and Earle Collections in the departmental reading-room in Philosophy Hall, the department possesses a special library of selected works which is at the disposal of graduate students. The department is also fairly well equipped with maps, plans, etc.; owns a large collection of photographs of Greek and Roman monuments, localities, and sculpture; and has a large number of squeezes of inscriptions. On the Roman side the Olcott Collection includes a valuable collection of ancient coins, some original inscriptions, and a collection of miscellaneous antiquities. The students of the University have free access to the collections of the Metropolitan Museum of Art for study and comparison.

*Equipment.* In addition to excellent working collections of constitutions, codes, session laws, judicial decisions, government reports, legal treatises, transactions of legal societies, and law journals of the principal foreign countries as well as of the United States, the Library of Columbia University offers special advantages to students of politics, public law, and comparative jurisprudence in the collections of Henry Livingston Thomas, late chief translator to the Department of State, of the Holland Society of New York, and of the Reform Club of the City of New York, of which the Columbia Library is the depository. The materials thus furnished are richly supplemented by those in the libraries of public institutions, learned societies, and civic organizations, particularly the Hispanic Society of America, with its unique collection

of materials relating to the history, institutions, and culture of Spain, Portugal, and Latin America, the Bar Association, and the Law Institute. To these libraries advanced students have access under favorable conditions. Fuller information as to courses and opportunities for historical work is given in the current *Announcement of the Division of History, Economics, and Public Law*, which may be obtained by applying to the Secretary of the University. Under the auspices of the Academy of Political Science, to which advanced students are eligible as members, opportunities are given for the discussion of questions of interest as presented in papers by specialists.

Lectures of special interest to students of politics and jurisprudence are maintained by specific endowments, such as the Beer lectures in political science, the Blumenthal lecture in politics, and the Carpentier lectures in law. Some of these lectures are given by distinguished foreigners, others by men prominent in public life in the United States.

One or more of the instructors are on the floor at all times when the Gymnasium is open.

A course in physical education is required of all freshmen and sophomores in Columbia College. A physical examination is required of each student in these classes upon entrance and at the end of the required work, and of all other students taking part in athletics.

Every student is entitled to a physical examination by the Medical Director. On the basis of this examination advice is given as to the kind and amount of exercise best adapted to his needs.

*Equipment.* The laboratories and lecture-rooms of the Department of Physics are in Fayerweather Hall. They are supplied with the usual general equipment of a physical laboratory.

The laboratories used for research work have been named by the Trustees the "Phoenix Physical Laboratories," in memory of Mr. Stephen Whitney Phoenix, who bequeathed to the University an endowment for research in physics and chemistry.

Under the direction of the professor of electro-mechanics, laboratories have been equipped in Philosophy Hall from the Marcellus Hartley Fund for research in the subjects of electricity and magnetism. The laboratories afford unusual opportunities for students desiring to specialize in these subjects.

The Ernest Kempton Adams Precision Laboratory is equipped with instruments of the best design and highest precision for measurements in mechanics, heat, light, radio-activity, and those branches of electricity not already provided for by the Marcellus Hartley Fund.

The physics laboratories at Barnard College occupy the second floor and a part of the basement of Fiske Hall. They are well equipped for quantitative experimental work in the courses offered.

The physics laboratories and lecture-room of Teachers College are especially equipped for illustrating the teaching of physics in secondary and normal schools.

About 1,000 periodicals are regularly received, and among them will be found every journal of importance, American or foreign, dealing with philosophy or psychology. Duplicates of the more important psychological books and journals are placed in the Psychological Laboratory, where there is also a card index of psychological literature containing over 65,000 titles. Students of psychology will also find much of value in the Library of the Academy of Medicine, 17 West Forty-third Street, which is open to students free of charge. *Journal Club.* Reports and discussions of recent literature by members of the staff, graduate students, and others. Bi-weekly throughout the year. Under direction of the staff.

*Equipment.* The zoölogical laboratories on the upper floor of Schermerhorn Hall comprise graduate and undergraduate laboratories, equipped with optical instruments, microtomes, and other apparatus; and rooms for special research, supplies, aquaria, and preparation. There is also a lecture room, a library, and an extended teaching collection comprising specimens, anatomical, embryological, and cytological preparations, charts, and wax models. The departmental library embraces sets of the standard biological works and includes the journals and a collection of special monographs.

Important adjuncts to zoölogical work are offered by the American Museum of Natural History, the Bronx Zoölogical Garden, the New York Aquarium, and by the marine biological laboratories to which the University contributes support. Several investigators' tables are held at the Woods Hole Laboratory, and the John D. Jones Scholarship is available at the Cold Spring Harbor Laboratory.

# UNDERGRADUATE ENTRANCE REQUIREMENTS

*University Committee on Admission.* Professor JONES, Director of University Admissions; Professors EVANS and MAYER; Deans WOODBRIDGE, STONE, DARRACH, GILDER-SLEEVE, and RUSBY; Directors EGBERT, MONROE, BIGELOW, BORING, and CUNLIFFE.

## GENERAL STATEMENT

The Director of University Admissions administers the entrance requirements for all departments of the University. No formal entrance tests are prescribed for graduates who elect to study under the Faculties of Political Science, Philosophy, or Pure Science, or to enter a professional school of the University which demands previous college residence as a basis for entrance; namely, Law, Medicine, Mines, Engineering and Chemistry, Architecture, Education, Business, Journalism, and Practical Arts (beginning in 1923). Candidates for admission to these schools should present their credentials from the college of previous residence. Entrance tests are prescribed for admission to all other departments of the University. Admission to the first year course in Columbia College, Barnard College, and the College of Pharmacy (University course for B.S. in Phar.), presupposes the passing of written examinations; the candidate's school record is also taken into account; but a satisfactory showing in examinations and in school preparation are not in themselves sufficient to guarantee admission, which depends also upon the candidate's character, personality, and promises of future usefulness. The passing of a psychological examination may be substituted for other written examinations, provided the candidate's record is accepted as satisfactory in all particulars.

Information regarding admission by transfer to the undergraduate schools will be found in the sections of the catalogue describing those schools.

*Applications for Admission.* Applications for admission should be filed not later than July 1 of the year when the candidate plans to enter.

## EXAMINATIONS AND RECORDS

The University issues annually a pamphlet entitled *Bulletin of Entrance Examinations and Admissions*. This pamphlet gives detailed information upon the following matters:

The time schemes for the examinations of the College Entrance Examination Board and of Columbia University.

The dates for filing of applications. (Given also in Academic Calendar at end of this volume.)

Method of obtaining, filling out, and filing application blanks and school records.

Fees for examinations and method of payment.

The award and duration of credits toward admission as a result of examinations, and information as to the conditions under which examinations may be divided among two or more series.

The specific conditions of admission to each school requiring entrance examinations.

The official statements of the requirements in each subject (including information as to the preparation and presentation of note-books in subjects requiring such records).

This pamphlet may be had without charge upon application to the Secretary of Columbia University. Any person who intends to take examinations himself or to prepare others for them should obtain a copy of it and familiarize himself with its

contents. *The information which follows here is merely a brief summary of that given fully and officially in the Bulletin.*

The minimum age for admission to the Freshman Class in Columbia College or Barnard College is 15; in other schools, 18; with a corresponding increase in the case of advanced standing. For students entering from secondary schools, an estimate of character and personality, and a certificate of health must be presented, and in the case of students from other colleges an honorable dismissal.

Students may enter Barnard or Columbia College either in February or in September. There are two methods of admission.

I. The new method, employing the psychological examination.

Candidates who have graduated with good grades from an acceptable secondary school and have completed an acceptable course of study, on submitting satisfactory records of school work, health, character, and promise, receive permission to substitute a psychological examination for the entrance examinations required by the old method. The course of study must have included the prescribed entrance subjects and must have been concerned primarily with language, science, mathematics, and history.

II. The old method, by entrance examinations.

(Students entering by the old method are required to take the psychological examination for purposes of record.)

(a) The student may satisfy the requirements in the subjects required for admission by passing entrance examinations covering 15 entrance units. In passing upon the results of the examinations in the several subjects, the candidate's school record is taken into account.

(b) On this plan a candidate whose school record has been approved may receive permission to satisfy the examination requirements by comprehensive examinations in not less than four subjects approved by the committee on admission. The comprehensive examinations in question must be those prepared by the College Entrance Examination Board or by Columbia University.

In passing upon the result of these examinations the detailed school record of the candidate is taken into account and given great weight.

The examination requirements for admission under the old plan may be satisfied by any one of the three following means, or by any approved combination thereof; the examination grades are interpreted in the light of the record which the student has made in school. The record for each subject must be filed with the Director of Admissions.

1. The examinations of the College Entrance Examination Board held at Columbia University and at about 150 other educational centers in the United States and Europe.

2. The examinations conducted at Columbia University by the Committee on Admissions.

3. The examinations of the New York State Examination Board in so far as their subject matter specifically corresponds to the stated requirements of the several undergraduate schools. These examinations are held in January and June at more than 600 high schools and other institutions in the State, but are ordinarily open only to students in those schools. A grade of seventy-five per cent. will ordinarily be required in these examinations.

## CREDITS

A candidate may present himself at any of the series of examinations scheduled above, but at not more than four in all, and the results may be credited toward entrance, subject to the following restrictions:

The results of an examination may stand to the candidate's credit twenty-nine months, but no longer. The reports of candidate's examinations and the School's

statement of preparation must be in the hands of the Director of Admissions one week prior to the opening of the term in September or February.

### SUBJECTS FOR EXAMINATION

Columbia University recognizes the following examination subjects which may be offered for admission to one or more of the colleges and schools included in the University, each subject counting for a specific number of units as indicated in parentheses.

The units here represent the number of years at the rate of five periods per week, which will normally be required in the secondary school to prepare adequately for the college examination.

The following abridged statements give the general scope of the requirements in each subject. It should be noted that in several cases an examination subject outlined below will not be accepted toward admission to every school of the University. A candidate or teacher should compare the list carefully with the statements of the requirements of the school in which he is particularly interested.

*Entrance.* For the details of admission to the Freshman Class, see Index.

*Advanced Standing.* A candidate for admission to advanced standing upon basis of work done at another college, should obtain and file not later than August 1 or January 1 preceding the session in which he desires to enter, the appropriate application blank, with a transcript of his academic record, and a marked catalogue of the institution that he leaves.

Appropriate credits up to a maximum of 18 points of the 124 required may be made by Freshmen who offer more than the prescribed number of units at entrance.

*Special Courses.* Students of serious purpose who are in a position to fulfil the requirements for admission to the Freshman Class or who have had a valuable educative experience in practical life, may be admitted as non-matriculated students to pursue courses without reference to any degree. For details see the current *Announcement of Columbia College*.

*Registration and Fees.* For information with regard to Registration and Fees, see Index.

*Scholarships.* For information with regard to scholarships, prizes and medals, see Index.

*Program of Studies.* The period within which the requirements for the degree of A.B. may be satisfied varies with the capability and industry of the individual student. In most cases four years are spent in making the required number of points; students of ability and industry frequently complete the course in less time, especially

if advantage be taken of courses in the Summer Session, or additional credit be gained by high standing; no student may spend more than six years as a candidate for a degree

*General Regulations.* The requirement for graduation is 124 points, the term 'point' signifying the satisfactory completion of work requiring attendance each half-year of one hour weekly in lectures, recitation, or honors conference, or a correspondingly longer period in laboratory or drafting-room.

Admission to courses depends strictly upon completion with the grade of C or better of the stated prerequisites.

A student in good standing is permitted upon completion of 94 points to elect approved graduate courses which his previous training will enable him to pursue with profit.

To be recommended for a degree, a student must have made at least 84 points in actual college residence, and of these at least 24 in Columbia College. (Supplementary details are given in the current *Announcement of Columbia College*.)

In the administration of the College regulations, it is the policy of the Committee on Instruction and of the Dean to be guided in the treatment of individual cases largely by the recommendation of the adviser, and by the general attitude of the student in question toward the College, *i. e.*, whether or not he has proved himself a creditable member of the college community, as shown by regularity in attendance, promptness in the fulfilment of his obligations, earnestness in his endeavor to profit by his college opportunities, both direct and indirect, and by consideration of others.

*Degree with Honors.* Students not exercising professional option may become candidates for General Honors. At least two years before graduation the student shall consult with the Dean or with a Director of Honors Work regarding the desirability of his declaring his candidacy for Honors.

If his candidacy is accepted, he shall (a) pursue a course of reading in common with other candidates for Honors, and (b) pursue a course of independent study in some field of knowledge which he may choose.

All such candidates for Honors will meet with the Honors Director Wednesday evening each week for a discussion of their common reading, will submit at least one written report involving individual work in their chosen subject in each of the four terms of their Honors course, and will finally be examined in the entire field of their Honors work.

Students exercising professional option, who complete their studies with high distinction, may, on the recommendation of the Committee on Instruction, be awarded General Honors, without pursuing the course in reading mentioned in (a) above.

Students who are not candidates for General Honors but who complete with high distinction a sequence of studies\* in a single department, which sequence has been approved for the purpose by the Committee on Instruction, may on receiving their degree be awarded Honors in the subject of their sequential work.

*For Degree without Honors.* Unless the equivalents have been offered for admission, the following courses are prescribed for students who are candidates for a degree, but not for honors:

(a) English A; Mathematics; Contemporary Civilization A; Physical Education A and B, one year of Laboratory Science, except for students offering Physics and Chemistry for entrance, and in addition:

- (b) 1. One year of College work in Latin or in Greek beyond the entrance requirement, and in addition French B, Spanish B, or German B, or
2. One year of College work in French, Spanish or German beyond course B, or

3. Completion of the stated entrance requirements for the College of Physicians and Surgeons, followed by the exercise of professional option in that School, and in addition:

(c) Prior to graduation the student must have completed the equivalent of three years of sequential study, in courses aggregating at least 18 points beyond the elementary requirement for admission, in each of two departments.

These prescriptions amount to a total of from 26 to 55 of the 124 points required for the degree, depending upon the student's offering at entrance and his college program.

*Professional Options.* Upon receiving the number of points in Columbia College specified below, a student may take studies in the first year of either of the following professional schools of the University, provided he can satisfy the stated requirements for admission thereto, and may receive a Bachelor's degree on recommendation of the professional school of his choice upon the satisfactory completion of two years' work in that school:

School of Business, 64 points

School of Journalism, 64 points

*Combined Courses.* Upon receiving 94 points, 64<sup>1</sup> of which must be for work in Columbia College, including all of the work prescribed for the degree in Columbia College, a student may take studies in the first year of any one of the following professional schools of the University, provided he can satisfy the stated requirements for admission thereto, and will receive the degree of Bachelor of Arts from Columbia College upon the satisfactory completion of the year's work:

School of Law

School of Medicine

Schools of Mines, Engineering, and Chemistry

School of Architecture

School of Journalism

School of Business

No course may be counted toward a professional degree and at the same time be included among those which go to make up the 94 points referred to above.

Students may also, under suitable circumstances, offer toward the Bachelor's degree courses given at the General Theological Seminary; or if they are within 12 points of receiving the Bachelor's degree, they may take certain graduate courses in addition to their undergraduate programs.

*Miscellaneous.* All students admitted with conditions are assigned for advice to the Committee on Admissions until such time as their entrance deficiencies are removed. All candidates for honors are assigned for advice to a representative of the department in which they first elect honor work. Special advisers are designated for students looking forward to law, medicine, engineering, and business, respectively. All other students are assigned to the Dean of the College, or to such officer of instruction or administration as he may designate.

The student's performance in a course is reported according to the following grades: A, excellent; B, good; C, fair; D, deficient, but subject to improvement in grade by re-examination; F, failure.

The grade of D is not a passing grade, and does not count for credit toward the degree. In case a mark of D is raised by a deficiency examination to a C or higher, full credit for the course is granted.

<sup>1</sup> In exceptional cases, students of high scholarship who have completed two years of college work elsewhere may satisfy the residence requirement by the completion in Columbia College of 34 points, with an average of B. Work done in the Summer Session or University Extension may not be included in these 34 points.

The mark A in six points of college work completed in any session entitles a student who has not fallen below the mark B to one point of extra credit.

Matriculated students whose record as to entrance conditions and the completion of prescribed course is satisfactory to the Committee on Instruction are classified as follows:

*Freshmen*, those who have less than 26 points

*Sophomores*, those who have completed 26 points

*Juniors*, those who have completed 58 points

*Seniors*, those who have completed 88 points

The following additional matters are dealt with in the current *Announcement of Columbia College*, which may be had upon application to the Secretary of the University: Description of Hamilton and Hartley Halls. Advice as to choice of studies. Regulations governing absences. Statement of courses which may be taken by the College students with their prerequisites. Personal relations of students. System of examinations. Records and reports. Schemes of attendance and recommended programs for students having particular ends in view. Scholarships and prizes.

# SCHOOL OF LAW

## FACULTY

President BUTLER.

Dean STONE.

Professors CANFIELD, DOWLING, GIFFORD, HICKS, McMURRAY, MOORE (JOHN BASSETT), MOORE (U.), OLIPHANT, PARKINSON, PATTERSON (E. W.), POWELL (R. R.), POWELL (T. R.), SMITH (MUNROE), SMITH (Y. B.) (*Secretary*).

Delegates to the University Council (see page 6).

---

*Purpose.* The design of the School of Law is to afford a thorough, practical, and scientific education in the principles of: The common and statute law of the United States; the English and American system of equity jurisdiction; the public law of the United States and Europe; the Roman law—ancient and modern; theoretical and comparative jurisprudence.

Opportunity is given through short special courses for specializing in particular fields.

*Application.* All applicants for admission must present satisfactory evidence of good moral character.

Admission to the School of Law as a matriculated student will be upon one of the following three conditions:

(a) Graduation from an approved college or scientific school of collegiate rank.

(b) The successful completion of three years of undergraduate study in an approved college or scientific school, which course of study must have included satisfactory courses in Economics and in English and American History.

(c) In lieu of either of the above, the presentation of satisfactory evidence of preliminary training obtained in higher institutions of learning, in this country or abroad, equivalent to that prescribed in either of the foregoing paragraphs (a) or (b).

*Advanced Standing.* Students complying with the above requirements for admission to the School, who have, in addition, successfully pursued the study of law for at least a year in an approved law school, on examination giving satisfactory evidence of proficiency in the studies of the first year, may be admitted to advanced standing as members of the second-year class. Examinations are usually required in the more important first-year subjects. No one will be admitted to advanced standing beyond the second year except by special vote of the Faculty.

The examinations for advanced standing cover all the work previously done by the class to which admission is sought, and are held at the end of the half-year in which the respective subjects are given and during the week preceding the opening of the fall term. Examinations may be dispensed with and credit given on certificate for courses satisfactorily completed in an approved law school in cases where such courses are deemed by the faculty equivalent to the corresponding courses given in this School.

*Non-Matriculants.* Duly qualified persons not candidates for the degree of LL.B. may be admitted as non-matriculated students on presenting such evidence as the Faculty may require of their exceptional fitness to undertake with advantage the study of law. Applicants must usually have two years or more of College or Law School work to their credit and must be at least twenty-one years of age.

*Examinations.* Written examinations are held at the end of each Session on the subjects completed during that Session, and deficiency and advanced standing examina-

tions are held during the week preceding the opening of the academic year. No special examinations are given.

All students, whether matriculated or non-matriculated, unless excused by the Dean, must present themselves for examination in all subjects for which they are registered at the first examination held therein, and, in case of excuse from any examination, must take the next examination offered in such subject unless otherwise directed by the Dean. A student permitted to take a deferred examination must pay a fee of six dollars as for a deficiency examination. Students are not permitted to take examinations in courses for which they are not registered.

At all stated examinations the standing of students will be indicated by the letters A, B, C, D, and F, representing Excellent, Good, Fair, Poor, and Failure, respectively. These marks will be part of the record of the students in the office of the Registrar, and will be reported to them in writing as soon as possible after each examination.

For the purpose of determining the capacity and eligibility of students to continue to profit by the work in the Law School, every student registered in the school will receive at the end of each year of residence a numerical grade representing his average grade for the work done during that year. No student who receives an average grade exceeding  $3\frac{1}{2}$  in the courses for which he is registered during any one year will be permitted to continue in the school or to be a candidate for a degree except by special vote of the Faculty. The student's average grade for each year shall be computed by assigning to the marks received during the year the following values: A = 1, B = 2, C = 3, D = 4 and F = 6. These values shall be added and divided by the number of courses in which the student has received a mark. In case a student is absent from the examination in any subject for which he is registered his mark in that subject shall be counted as F for the purpose of determining his numerical grade unless he shall be permitted by the Dean to discontinue the course or postpone the examination therein. In case a student is permitted to postpone an examination he must take the next examination given on the subject unless otherwise directed by the Dean, and his average for the year during which the course was taken shall then be computed. A year of residence within the meaning of this rule is attendance for two Sessions which must be Winter or Spring Sessions, or one Winter or Spring Session and two Summer Sessions.

No student receiving a mark of F in any subject during any Session will be permitted to take a second examination in that subject without having again taken the course in which such failure occurred, nor will any student receiving a mark of F a second time in any subject be permitted to continue in the school or to be a candidate for a degree except by special vote of the Faculty.

A student receiving a mark of D in any subject during any Session and who is entitled to continue in the school will be permitted to take one re-examination in that subject, which examination must be taken within one year after the end of the Session in which such mark is received. Students failing to remove a mark of D within one year shall not be entitled to re-examination without repeating the course.

The mark received by any student upon an examination taken to remove a D shall be substituted for the D previously received and shall have the same value and effect as though it were received in the student's first examination in that subject.

*Bachelor of Laws.* The required work for the degree of Bachelor of Laws consists of seventy-six points, each point representing the satisfactory completion of work requiring attendance one hour a week for a Winter or Spring Session. This requirement must be satisfied by a three years' residence and is usually met by a program embracing the prescribed work of the first year, and twelve hours or more of lectures per week through the second and third years.

No candidate for the degree may take less than twelve hours nor more than fourteen hours per week in the Winter or Spring Sessions.

Students registered in the law school will receive credit not exceeding seven points in any one year for law courses successfully completed by them in the Summer Session of the University. Attendance at a Summer Session will be deemed equivalent to one fourth year's residence.

Only those courses in which the student receives a mark of C or better may be counted towards the degree, except that in the required courses of the first year a student may count one mark of D towards the degree.

No student receiving a mark of F in any subject during any Session will be admitted to the degree unless within two years of such failure he receives a mark of C or better in that subject.

Non-matriculated students who have been members of the School for at least two years may become eligible for the degree if they shall have attained a numerical average of  $2\frac{1}{2}$  or less in all the work prescribed therefor.

*Master of Laws.* For regulations with regard to the degree of Master of Laws, see Index.

*Higher Degrees.* The degrees of Master of Arts and Doctor of Philosophy are also awarded for work done in part under the Faculty of Law. (See Index.)

*Scholarships and Prizes.* For list of Scholarships and Prizes, see Index.

*Fees.* For summary of fees, see Index.

*Library.* The Law Library has been greatly extended and improved, and now consists of upwards of 95,000 volumes, which have been carefully selected to meet the wants of students. It contains practically every reported decision of the American, English, and British Colonial courts, and good working collections of American and foreign statute law, Roman and modern civil law, and jurisprudence. Lectures on legal bibliography and the use of law books are given by the Law Librarian.

*Historical.* King's College—the original foundation of Columbia University—organized a Medical Faculty in 1767, and was the first institution in the North American Colonies to confer the degree of Doctor of Medicine in course. The first individuals to graduate in medicine from the College were Robert Tucker and Samuel Kissam, who received the degree of Bachelor of Medicine in May, 1769, and that of Doctor of Medicine in May, 1770, and May, 1771, respectively. Instruction in medicine was given from this time on until the work of the College was broken up by the War of the Revolution. In 1784 an act was passed making Columbia College in the City of New York the successor of King's College, and instruction was resumed in the academic department. Eight years later the Medical Faculty was re-established, and was continued until 1814, when the Medical Faculty of Columbia College was merged in the College of Physicians and Surgeons, which had received an independent charter in 1807. In 1860, by agreement between the Trustees of the two institutions, the College of Physicians and Surgeons became the medical department of Columbia College, and from that time on the diplomas of the graduates were signed by the President of Columbia College as well as by the President of the College of Physicians and Surgeons. The connection was only a nominal one, however, until 1891, when the College was definitely merged in the University.

*Location and Equipment.* The College of Physicians and Surgeons was first situated at 18 Robinson Street, from 1807 to 1809. From 1809 to 1813 it was at 12 Magazine

Street; from 1813 to 1837 at 3 Barclay Street; from 1837 to 1856 at 67 Crosby Street; and from 1856 to 1887 at 101 East Twenty-third Street. It now occupies a group of buildings which stand upon thirty contiguous lots of land, bounded on the south, west, and north by Fifty-ninth Street, Amsterdam Avenue, and Sixtieth Street, respectively.

*Main Building.* The main College buildings have been designed to facilitate the combination of theoretical instruction with laboratory work, which is essential to a modern scientific training. In these buildings, which have a floor space of 120,000 square feet, are the lecture halls, the recitation rooms, and the laboratories, under the supervision of their respective professors, all thoroughly equipped for the routine work of the regular classes and for the special original and research work of the advanced students, instructors, and professors of the several departments; the administrative offices, the laboratories of physiology, bacteriology, anatomy, embryology, and histology, organic and biological chemistry, medicine, neurology, surgery, pharmacology, pathology, and clinical pathology, the morphological museums and laboratory, a dissecting-room accommodating 400 students, and two large amphitheaters.

For a more detailed account of the equipment of each department, see the departmental statements.

*Alliance with the Presbyterian Hospital.* A permanent affiliation between Columbia University and the Presbyterian Hospital was accomplished last year. The two institutions are proceeding to plan for and erect new buildings in close geographical and functional relationship. This has been made possible through the following generous gifts recently received—a million dollars each from The Carnegie Foundation, The Rockefeller Foundation and The General Education Board; a plot of ground at Broadway and 165th Street and an additional million dollars for endowment from Mrs. Stephen S. Harkness. The two institutions will maintain their corporate independence, but all affairs affecting the two are in the hands of a Joint Administrative Board consisting of three of the Trustees of Columbia University, three of the Managers of the Presbyterian Hospital and the Dean of the Medical Faculty. Two additional grants from The Commonwealth Fund have been received for special work work in epilepsy and rickets, which is being carried on in the Departments of Neurology and Pathology respectively.

*Library.* The libraries of the College of Physicians and Surgeons consist of a general reference library with reading room, and the special libraries of various departments. The general reference library is located on the first floor of the main building. It is open during the day and evenings and is freely accessible to all students. It contains 12,000 volumes and as many pamphlets, which include a collection of current text-books and monographs and the most important current medical journals. The books are classified according to the classification of the Library of Congress, and are catalogued with author, subject, and title entries. The catalogue will eventually become a union catalogue of all books in the different libraries of the College. The special libraries are located in the rooms of the various departments. They consist largely of periodical literature, but include many monographs and other books relating to the subjects of the respective departments. They are of special interest to the investigators in these departments, but may be used by other students upon special request. The library is open on week days from 9 a. m. to 5 p. m. and from 6 p. m. to 10 p. m., and on Saturdays from 9 a. m. to 12 noon.

More than 300 periodicals are received in the several libraries of the College. The number of volumes and pamphlets is as follows:

Anatomy, 3,100 volumes, 3,000 pamphlets; Biological Chemistry, 3,400 volumes, 10,000 pamphlets; Pathology, 6,300 volumes, 2,000 pamphlets; Pharmacology, 600 volumes; Physiology, 10,500 volumes, 14,000 pamphlets; Practice of Medicine (Jane-way Library), 7,500 volumes, 3,400 pamphlets; Reference Library, 12,000 volumes.

12,000 pamphlets; Crocker Fund, 2,000 volumes; total 45,400 volumes, 44,400 pamphlets.

This Fund was established by a legacy from the late Mr. George Crocker for the purpose of conducting an investigation on the subject of cancer. The research laboratories of the Fund are situated at 1145 Amsterdam Avenue, on the northeast corner of 116th Street. The building is a three-story and basement, fireproof structure of brick and concrete, erected by the trustees of the University to afford greater facilities for the workers in the Fund than could be obtained in the present buildings of the College of Physicians and Surgeons.

The object of the Fund is the promotion of research in the diagnosis, cure, and cause of cancer. Voluntary workers who have had suitable preparation in pathological histology and pathology are welcome and will be given sufficient instruction to enable them to pursue, in a satisfactory manner, some phase of cancer research. Formal courses in pathological technique and tumor biology also will be offered by the staff. During the first half of 1922-1923 Professor Wood will offer a course of lectures and laboratory exercises on the classification and diagnosis of human tumors, and following this, Professor Woglom will offer a course of lectures and demonstrations on the general biology of tumors.

*Vanderbilt Clinic.* The Vanderbilt Clinic is a fully equipped dispensary for the sick poor. It affords ample material for extended practical clinical instruction in the various departments of medicine and surgery, as the professors, with their clinical assistants, have the entire charge of its practice. The building is so arranged that each department has a room for the practical instruction of students in small sections, in addition to the rooms devoted to the treatment of patients; besides, there is a large theater for clinical lectures and a small lecture hall. Modern appliances for the treatment of diseases have been introduced, so that students can learn thoroughly the use of methods in each of the special departments of medicine. During the year 1920, 34,375 patients were treated, making 174,108 visits to the Clinic. For detailed information as to the clinical lectures held here, see the departmental statements in <sup>v</sup>this volume, or the current *Announcement of the College of Physicians and Surgeons*.

*Sloane Hospital.* The Sloane Hospital for Women is under the direction of the Professors of Obstetrics and Gynecology in the College of Physicians and Surgeons, an Instructor in Obstetrics and an Instructor in Gynecology being the Resident Officers. The wards of the Hospital furnish 107 obstetrical beds, 100 babies' cribs, and 25 gynecological beds. In addition there are 38 private room beds and accommodations for the house staff, students, and nurses. There are two large operating rooms, one for obstetrics and one for gynecology, each equipped with modern appliances for dealing with these conditions, where weekly clinics are held throughout the year. The deliveries number about 1,950 each year.

With the completion of the Gynecological Department of the Sloane Hospital, the operative material of the large gynecological service of the Vanderbilt Clinic is made available for teaching purposes, so that students of the College of Physicians and Surgeons receive on the college grounds practical instruction, not only in normal and complicated obstetrics and the care of young babies, but in the treatment, operative and palliative, of all diseases of the female pelvic organs.

*Hospital Clinics.* The College is strongly represented on the staffs of most of the general and special hospitals of New York. In them both required and optional practical instruction is given by clinical lectures, in the operating room, in the dispensaries and at the bedside, all of which are prominent features of the curriculum. These hospitals are as follows: Roosevelt, Bellevue, Presbyterian, New York, St. Luke's, Lenox Hill, Mt. Sinai, City, Lincoln, New York Orthopedic Hospital, St. Mary's Free Hospital for Children, Willard Parker, Scarlet Fever and Reception, New York Eye and

Ear Infirmary, the Babies' Hospital, Herman Knapp Memorial Eye Hospital, and the Montefiore Home and Hospital. For a detailed statement, see the current *Announcement of the College of Physicians and Surgeons*.

*Plan of Instruction.* The course for the degree of M.D. must begin with the Winter Session. The requirements for admission are given elsewhere, but too much stress cannot be laid upon the desirability of a student fulfilling the spirit as well as the mere letter of these requirements.

In the arrangement of the different branches of the medical instruction, a logical order of the main themes and a coordination in the work of each department have been sought after, enabling the student to concentrate his attention upon some one subject and to be so familiar with it that the allied subjects next to be taken up shall be readily understood. The salient features in the method of instruction are thorough laboratory training, frequent demonstrations, clinical teaching at the bedside, as well as in the dispensaries and in the operating theaters, with recitations and lectures to elucidate the many problems confronting the students.

*First Year.* During the first year the time of the student is devoted to anatomy, including neuroanatomy, histology and embryology, which is carried on by numerous demonstrations to sections and by long periods of uninterrupted work in the dissecting room. Physiology and biochemistry are taught by lectures, demonstrations, recitations and practical work in the laboratory. Biochemistry is completed in the first year.

*Second Year.* During the second year, anatomy, physiology, and bacteriology, general and gross pathology, and pharmacology will be completed. Courses in the principles of surgery, physical diagnosis and clinical microscopy, public health and psychiatry will also be given, leading up to the work of the third year.

*Third Year.* The third year will continue with conferences in medicine and surgery, gynecology, diseases of children and therapeutics. There are theoretical or clinical lectures, demonstrations, diagnostic clinics, operative clinics and follow-up clinics in medicine, surgery, urology, obstetrics, gynecology, neurology, psychiatry, diseases of children, ophthalmology, dermatology and syphilology, laryngology, otology and orthopedic surgery. The class is divided into small groups for instruction in physical and medical diagnosis, and for practical work in the special branches of medicine and surgery at the various dispensaries and hospitals.

*Fourth Year.* During the fourth year the student spends most of his time in the hospitals and dispensaries of the city. Consequently, although a few general and clinical lectures are given, the work is almost entirely practical and bedside instruction. Divided into small groups, the students continue to come into personal contact with patients, under the supervision of the instructor. In the diagnostic clinic they have the opportunity of applying the various methods of precision whose principles they have studied in earlier years; and they are expected to become familiar with the history of a case, to make a complete physical examination, to form a diagnosis, to give a prognosis, to advise treatment, and to watch progress. In the course in surgery the witnessing of numerous major and minor operations is supplemented by an optional course in which the student is taught operative technique. For an obstetrical service, the facilities of the Sloane Hospital for Women, and the Out-patient Obstetrical Department, in connection with the Nursery and Child's Hospital, offer excellent opportunities. The student is required to spend five weeks at the Sloane Hospital for Women or Nursery and Child's Hospital and personally attends a certain number of cases of labor. The course in diseases of children includes didactic lectures to sections, bedside instruction and out-patient work in wards and dispensary of the Bellevue, Presbyterian, St. Luke's and St. Mary's Hospitals, where exceptional advantages are enjoyed by the student for studying all forms of acute dis-

case in infants and young children. The course is rounded out by personal instruction in the more special branches of medicine. In these branches the student is taught how to use many instruments of precision and to recognize and treat many of the rarer forms of disease. Courses in the wards of the Presbyterian and Bellevue hospitals are required of fourth-year medical students. These courses consist of work in the wards of the hospitals, during which the students serve as clinical clerks in medicine or surgery and become, for the time, members of the regular staff.

*Requirement for Admission.* No definite information regarding eligibility can be given until official transcripts have been submitted for evaluation.

It is desirable that candidates make application before April 15, as on or about July 1 the Committee on Admissions will act upon all applications received up to that date. Application blanks will be furnished by the Dean's Office of the College of Physicians and Surgeons.

A collegiate course of four years leading to a Baccalaureate degree is considered the most desirable preparation for those expecting to undertake the study of medicine.

The minimum requirements which will be accepted for admission are attendance for two full years of at least seven months each at an acceptable college of arts and sciences, comprising 72 points as rated by Columbia College. The courses taken at college must include the following:

- 1 year Physics, aggregating 8 semester hours or more.
- 1 year Inorganic Chemistry, based on college entrance Chemistry, aggregating 6 to 10 hours.
- ½ year Qualitative Analysis, at least 4 hours.
- ½ year Organic Chemistry, at least 4 hours.
- 1 year Biology, aggregating 6 semester hours or more.
- 2 years English, aggregating about 10 hours.
- 1 year French or German, based on 2 years elementary study of the same language in secondary school or one year of the same language in college, aggregating about 14 hours.

Suitable laboratory work must be included in each of the courses in science.

Under Columbia College's rating system a student's performances are reported according to the following grades:

A—excellent; B—good; C—fair; D—condition; F—failure.

In the evaluation of credentials submitted not more than one science course graded "D" (or its equivalent) may be counted in estimating the total points.

The following credentials must be submitted at, or mailed to the Dean's Office, College of Physicians and Surgeons.

- 1. Official transcripts of College records and one duplicate of same.
- 2. Application for admission (blank furnished by this School on request).
- 3. A properly executed oath of allegiance (blank furnished by this School on request).
- 4. Official transcripts of High School records must be furnished only in case the College record fails to show the college entrance credits.
- 5. In addition to the above credentials the applicant must furnish:
  - a. A fee of 25c. (in silver) covering cost of issuance of a Medical Student Qualifying Certificate.
  - b. Three full face, unmounted photographs (size 1½ x 1½ inches) of applicant, without hat.

When the papers of an applicant have been favorably passed upon by the Director of Admissions, they will be forwarded to the New York State Department of Education for approval and the issuance of a Medical Student Qualifying Certificate, if approved.

A Medical Student Qualifying Certificate, which is the official evidence of the fulfillment of the requirements of the State, must be filed at this School before the student begins the first annual medical course counting towards a medical degree. This precludes the admission of conditioned students.

The State Department of Education will issue a Medical Student Qualifying Certificate only upon receipt for evaluation of original transcripts from the institution in which the work for which credit is asked was done. Therefore, applicants who have taken parts of their premedical work in different colleges must furnish original credentials from each college in which work was done.

Owing to the limited number of students who can be accommodated, completion of the requirements for entrance does not guarantee admission. The entire premedical record of each student is carefully examined by the Committee on Admissions in order that those who are adjudged most capable of meeting the exacting demands of the course and of the profession of medicine may be selected.

It is highly desirable that all applicants for admission to this school shall report at the Dean's Office for a personal interview some time prior to the action of the Committee on Admission, preferably before May 15.

*Combined Courses with Other Universities.* The University of Rochester, Colgate University, and Hobart and Ripon Colleges, will confer the bachelor's degree upon students who have elected and successfully completed the first year at the College of Physicians and Surgeons in lieu of the senior year in those colleges.

*Admission to Advanced Standing.* Students will not be admitted to advanced standing upon examination, but only upon a satisfactory record from their school of previous residence. Provided they are eligible for the Medical Student Qualifying Certificate required by the New York State Department of Education and can submit evidence of the satisfactory completion of the entrance requirements as stated on page 38, candidates who have completed, without condition, one or two years of study in a Grade A medical school are eligible to apply for admission to the Second or Third Years respectively.

Owing to the lack of uniformity in the arrangement of the First and Second Year curricula in the various medical schools a transfer can usually be accomplished with the least adjustment at the end of the Second Year.

The following credentials must be submitted:

1. Official transcript of High School record (in duplicate), is required only when the College record fails to show college entrance credits.
2. Official transcript of College record (in duplicate).
3. Application for admission (blank provided by this school on request).
4. A properly executed oath of allegiance (blank provided by this school on request).
5. Official transcript of medical school record.
6. A properly executed advanced standing blank, required by the State of New York (blank furnished by this school).
7. In addition to above credentials applicant must furnish:
  - a. Fee of 25c. (in silver) covering cost of issuance of Medical Student Qualifying Certificate.
  - b. Three full face, unmounted photographs (size  $1\frac{1}{2} \times 1\frac{1}{2}$  inches) of applicant, without hat.

Admission to the Fourth Year is limited to students who have already secured the degree of Bachelor of Arts or Science and of Doctor of Medicine from a Grade A medical school. Applicants for admission to the Fourth Year must furnish these credentials in addition to the others required for advanced standing.

*Admission of Special Students.* Graduates in medicine or students who desire to

pursue a special course without graduation may matriculate as special students, after approval by the head of the department conducting the course and the Dean. Such special work will not count in any way as part of the course required of candidates for the degree of Doctor of Medicine.

*Post-Graduate Instruction.* A few courses are open to graduates in medicine. For further information see departmental statements.

*Summer Session* (July 10-August 18, 1922). Courses in the Summer Session are open to all properly qualified students. They will not count toward the degree of Doctor of Medicine, for those who are students at the College of Physicians and Surgeons, or those who, being eligible for admission to advanced standing, have not had in their previous course of study any of the subjects offered. Courses in the Summer Session cannot be accepted from students prior to matriculation in the College of Physicians and Surgeons to fulfill omissions in their work. Such courses cannot be offered to supply deficiencies caused by failures of required courses in other medical schools. Such courses cannot be offered to anticipate work required from students of equal rank. The following courses offered in Summer Session are similar to but not equivalent either to courses required or elective in the Winter and Spring Sessions; *Bacteriology*, Dr. DWYER and assistants; *Morphology and Biology of Tumors*, Professors WOOD and WOGLOM; *Clinical Pathology*, Professor VOGEL and assistants; *Neurology and Neuro-Anatomy*, Professor TILNEY and assistants; *Histology*, Dr. ELWYN; *Minor Surgery*, Dr. LEWIS and Dr. CLEVELAND. For full particulars and an *Announcement of the Summer Session* apply to the Assistant Registrar.

*Requirements for Graduation.* The course for the degree of Doctor of Medicine consists of the subjects shown in the Summary of Studies (p. 254), all of which are required. Elective courses are not counted for credit toward the degree.

In addition to complying with the requirements for admission and to completing the required work of the curriculum, each candidate for the degree of M.D. must present satisfactory evidence, as required by law, of good moral character, and of having attained the age of twenty-one years. If the candidate shall have been admitted to advanced standing, he must have spent not less than four academic years (no two of which shall have begun during the same calendar year) in an approved medical college in the study of the subjects making up the curriculum of the School of Medicine.

Students who elected the combined course of seven years in Columbia University will receive the degree of A.B. from Columbia College upon the completion of the first year of the medical course.

*Scholarships, Fellowships, and Prizes.* (See Index.)

*Equipment.* Detailed information as to the laboratories, collections, and other facilities for study will be found in the statements of the various departments of instruction, page 95 *et seq.*, and more fully in the current *Announcement of the College of Physicians and Surgeons*.

## COURSE OF STUDY LEADING TO THE DEGREE OF M.D.

---

The Trustees of Columbia University, in accordance with the unanimous recommendation of the Faculty of Applied Science, determined in 1912 to raise the requirements for admission to the Schools of Mines, Engineering, and Chemistry, and generally to elevate and strengthen the course of engineering and technical study, from and after July 1, 1914. These schools at that time became advanced or graduate schools to which students of any branch of engineering, who have had a suitable preliminary training in a scientific school or college, may come for the highest type of professional instruction and for training in methods of research.

Candidates for admission are required to present evidence of such preliminary general education as can ordinarily be had only by taking at least three years of study in a college or scientific school of high rank.

The schools under the Faculty of Applied Science offer the following courses:

The School of Mines. Three-year advanced courses leading to the degrees of Engineer of Mines and of Metallurgical Engineer.

The Schools of Engineering and Chemistry. Three-year advanced courses in Civil Engineering, Electrical Engineering, Mechanical Engineering, Chemical Engineering, and Industrial Engineering, leading to the degrees of Civil Engineer, Electrical Engineer, Mechanical Engineer, Chemical Engineer, and Master of Science in Industrial Engineering, respectively.

The courses are intended to meet the requirements of the several professions indicated; and many of them permit a certain amount of specialization, particularly in the third year. The work in the School of Mines is so arranged that the student can emphasize the engineering, the metallurgical, or the geological side of his profession.

Candidates for a professional degree who have some special end in view may be permitted to vary the regular program by substituting other subjects offered under the Faculty of Applied Science.

*Requirements for Admission.* Admission to the Schools of Mines, Engineering, and Chemistry will be upon one of the two following conditions:

A. The satisfactory completion of not less than three full years of study or the equivalent in an approved college or scientific school in a course including the usual cultural subjects, thorough training in mathematics, general physics, general chemistry, and qualitative analysis, together with first courses in drawing and mechanics. Such a preparation can be obtained in any of the better colleges and should approximate in its content the program of studies offered in Columbia College for this purpose.

B. In the case of a candidate of mature years who may not be able to fulfill the requirements above in every respect, but who has had a successful professional experience, evidence acceptable to the Faculty of fitness to undertake the courses in engineering.

It is desirable that candidates for admission make application in the spring in order to ascertain whether it would be advisable to attend the Summer Session in July and August with a view of completing the requirements for admission.

Graduates of colleges and technical schools may be admitted to advanced standing by submitting evidence that they have satisfactorily completed courses required in the class or classes preceding the one for which application for admission is made.

Students who plan to do their college work elsewhere should apply without fail to the Secretary of the University for advice regarding the choice of their studies in order to make certain that they may be able to meet the requirements for admission by the time their college work is completed.

*Preparatory Courses in Columbia College.* The attention of students who wish to pursue a course in the Schools of Mines, Engineering, and Chemistry is directed to the course in Columbia College, especially arranged for study preparatory to the work in engineering. See the current *Announcement of Columbia College*.

*Registration and Fees* (See Index).

*Fellowships and Scholarships* (See Index).

## SUMMARY OF PROFESSIONAL COURSES OF STUDY

NOTE: Detailed tabular arrangements of each year of these courses will be found in the current *Announcement of the Schools of Mines, Engineering, and Chemistry*.

### ENGINEER OF MINES

The instruction during the first year includes fundamental training in physics, mechanics, chemistry, mineralogy, geology, and engineering, as outlined in the program of studies. Instruction in the second and third years includes mining engineering, metallurgy, and advanced geology, and certain subjects in civil, mechanical, and electrical engineering.

The engineering, mining, and metallurgical laboratories are equipped to train the student in the making of scientific tests of engineering materials, and working tests of machines and processes of ore treatment, thus preparing him, as far as it is possible in the school, for work that he will be called upon to do as an engineer.

Practical instruction in summer classes in the field is made an important feature of the curriculum.

While much time is given to practical training in the laboratories, in the field, and at the mines and metallurgical establishments, care is taken to subordinate this instruction to a high standard of accomplishment in class-room work.

#### MINING GEOLOGY

The objects for which the course in Mining Geology is designed are set forth in the general statement preceding, and in the information circular of the Department of Geology.

The requirements which must be fulfilled in order to obtain the degree of Engineer of Mines in this course are given in the following list of studies for each of the three graduate years.

In general the course differs from the regular mining engineering course by the inclusion of much more study and field work in geology and less of mechanical and electrical engineering subjects. It is, however, a real engineering course and not simply a course in geology such as may well be taken by a graduate student specializing in that subject alone. While not all students taking this course will look forward to geological work as applied to mining, that application is so important as to justify the inclusion of such instruction in mining.

It is possible for men more fully prepared, or entering with advanced standing, to take additional graduate subjects both in engineering lines and in geology.

*First Year.* Winter Session: Chem. 181, Drafting 7, 9, Elect. Eng. 101, Geology 5, Mechanics 103, Mineralogy 117, Physics 149.

In the second year instruction is given in metallurgy and in mechanical, electrical, and mining engineering, chemistry, mineralogy, and geology. The third year is devoted largely to advanced lecture courses and laboratory work in metallurgy, to important courses in mining engineering, and to the higher branches of engineering.

In the summer instruction is given in general surveying work, and visits are made to metallurgical works. In the five weeks summer courses at metallurgical works the students are required to study processes, make dimension sketches of furnaces and mills, and by observation and instruction become acquainted with metallurgical operations.

#### ELECTRICAL ENGINEER

The program for the three years of professional study in electrical engineering outlined below is based upon a definite plan of commencing in the first year with a broad training in the most important subjects of all branches of engineering, notably, chemical engineering, metallurgy, mechanical and civil engineering, intended to give the student a true perspective of engineering as a whole and an engineering point of view.

In the second year more specialized electrical engineering is introduced and less of

allied subjects while finally in the third year almost all of the student's time is devoted to his chosen specialty.

The courses are designed to teach the principles rather than the details. They may be divided into three general classes: theoretical, technical and practical. The theoretical courses are given mainly by the Department of Physics, extend through the whole three years and are designed to give the student an insight into the applications of mathematics and physics to the fundamental principles of electrical phenomena.

Closely in parallel with the theoretical courses are the technical courses which show the applications of the principles discussed in the theoretical courses. These are intended to familiarize the student with the terms, practices, instruments and appliances of the profession. Problems are given which involve concrete applications of the principles learned.

The practical courses are those of the laboratory and the drafting room and their context is closely coordinated in time and subject matter with the theoretical and technical courses thus serving as illustrations and examples.

*First Year.* Winter Session: Chem. Eng. 161, 181, Elect. Eng. 101, Mechanics 103, Mech. Eng. 105, Metallurgy 131, Physics 149.

Spring Session: Chem. Eng. 184, Civil Eng. 176, Elect. Eng. 130, Mech. Eng. 102, 106, Mechanics 104, Physics 150.

Summer Work: Elect. Eng. 131S.

*Second Year.* Winter Session: Civil Eng. 155, Elect. Eng. 103, 121, Mech. Eng. 121, 161, 113, 145.

Spring Session: Elect. Eng. 108, 110, 122, Mech. Eng. 122, 162, Physics 112.

Summer Work: Elect. Eng. 133S.

*Third Year.* Winter Session: Elect. Eng. 105, 109, 123, 125, Mech. Eng. 135, 141, Physics 113.

#### MECHANICAL ENGINEER

All subjects leading to the degree of Mechanical Engineer are listed in the following table, together with the year and term in which they are given. The first year is devoted to essential preparatory and introductory subjects, so treated as not only to prepare for later work directly but to give a survey of all that is to come. In the second year there are developed the basic principles of thermodynamics, resistance of materials and hydraulics, which are fixed in the mind of the student by drill, in the drafting-room by design courses, in the laboratory by experiments and tests, and in class by analysis of standard mechanical and electrical machinery. The third year is devoted to a detailed treatment of gas, steam, and water-power units and plants and to factory buildings, equipment, processes, and management. Throughout the course the aim is to develop clear conceptions of underlying principles, habits of independent thought and orderly mental procedure applicable to any sort of mechanical engineering problems rather than to the memorization of isolated facts. The training given not only fits the student to take up the design of machinery and the perfection of processes of doing things by mechanical means, but also to take ultimately a leading place in the management of the manufacturing and transportation industries as engineer or executive.

*First Year.* Winter Session: Chem. Eng. 161, 181, Elect. Eng. 101, Mech. Eng. 109, 111, Mechanics 103, Metallurgy 131, Physics 149.

#### CHEMICAL ENGINEER

The courses of instruction leading to the degree in Chemical Engineering are laid out with the purpose of training men to develop and direct those industries and manufacturing operations and processes which are based on the applications of chemistry. This requires a broad knowledge of engineering, in addition to a thorough training in chemistry. Hence much attention is given to fundamental courses under the departments of mechanical, electrical, and civil engineering. It is sought to advance the student's knowledge of analytical, physical and organic chemistry, and the physical problems entailed in carrying out chemical reactions on a large scale. Due emphasis is also given to the design, inspection and management of factories.

Considerable time is devoted to actual manufacture on a semi-factory scale, with full reports on details of costs and yield as related to types of processes and equipment. The final thesis work involves library study, laboratory research and engineering application.

*First Year.* Winter Session: Chemistry 41, 63, Chem. Eng. 181, Elect. Eng. 101, Mechanics 103, Physics 149.

Spring Session: Chemistry 42, 64, Chem. Eng. 148, 162, Mech. Eng. 102, Mechanics 104.

#### INDUSTRIAL ENGINEERING

This course of study occupies a period of three years, and is divided into four main groups. The business group embraces instruction in accounting, money and banking, business law, corporation, finance and business statistics. The machinery group embraces instruction in power machinery, thermodynamics, mechanical laboratory, machine design, and factory construction and equipment. The general engineering group covers the fields of metallurgy, strength of materials, industrial chemistry, electrical engineering, including alternating current machinery and physics laboratory. The industrial group deals with labor problems, factory management, analysis of selected industries, manufacturing processes, and the selection of manufacturing equipment for productive processes. About the same amount of time is spent with each of these groups of subjects.

During the two summer periods of the course the student is required to be employed in one or more of these industries, and his studies during these periods of service are directed toward both the good and bad practices to be encountered. Frequent reference is made in his subsequent studies to the reports he makes on these experiences.

Students completing course of instruction will be awarded the degree of Master of Science (in Industrial Engineering).

#### REGULATIONS FOR THE DEGREES OF MASTER OF ARTS AND DOCTOR OF PHILOSOPHY

In order to be admitted to the University under the Faculties of Political Science, Philosophy, or Pure Science, a student must hold a baccalaureate degree in arts, letters, philosophy, or science, or an engineering degree, from an approved institution, or have an education equivalent to that represented by one of these degrees.

Students are advised to ascertain, by addressing the Director of University Admissions, before coming to the University, whether the college from which the baccalaureate degree has been received is upon the list of institutions whose degrees are accepted by Columbia University as entitling the holder to admission under one of these faculties; or for a ruling upon an education claimed to be the equivalent of an acceptable Bachelor's degree.

A student who is graduated from a college which is not on the approved list should submit (1) an official transcript of his college record, showing the grades received in the several courses; and (2) a catalogue of his college in which he has marked (a) each of the subjects that he offered for admission, and (b) each course for which he has received credit toward the degree.

Students of mature age and special fitness whose previous education does not entitle them to admission as students under one of these faculties, may be admitted as students in the University, and, with the authorization of the Director of University Admissions, may register for courses under the control of these faculties. In general, students who do not hold the first degree or its equivalent are recommended to apply for admission to Columbia College, Barnard College, or the School of Practical Arts.

Every student is admitted subject to the disciplinary powers of the University.

No degrees are granted by the University for work done *in absentia* and a minimum residence in the University of one academic year is required of every candidate for a degree. A year of residence under the Faculties of Political Science, Philosophy, and Pure Science is defined as registration for and attendance upon courses aggregating not less than thirty tuition points, distributed over a period of not less than one academic year or its equivalent. Four Summer Sessions or two Summer Sessions together with a Winter or Spring Session are equivalent to one academic year. In certain cases and by special arrangement time exclusively devoted to investigation in the field will be credited in partial fulfillment of the residence requirement of candidates for the degree of Doctor of Philosophy.

*Students in Professional Schools.* A student holding the required first degree who is primarily registered in a professional school of Columbia University, or in an allied professional school, may, with the consent of the faculty of such school, be registered under the Faculties of Political Science, Philosophy, or Pure Science. In case such a

student is accepted as a candidate for a degree, he must conform to all the rules and regulations of these faculties; but he may offer as the equivalent of fifteen tuition points for residence for the degree of Master of Arts or in part fulfilment of the residence requirements for the degree of Doctor of Philosophy such of his professional courses as may be approved for such purposes by the Dean.

#### *Doctor of Philosophy*

A student admitted to the University under the jurisdiction of the Faculties of Political Science, Philosophy, or Pure Science, who wishes to become a candidate for the degree of Doctor of Philosophy, will be matriculated by the Dean upon the recommendation of the department in which his research work lies. Departments will recommend students for matriculation upon the following conditions:

1. The student must have pursued graduate studies in residence in this University or in some other institution approved by it for the equivalent of at least one academic year as defined in the regulations of the University.

2. The student must have satisfied the department that he is proficient in such languages as it may under the rules of the Faculty prescribe.

3. The student must have satisfied the department that he is prepared to undertake researches under its direction.

The Dean will admit a candidate for the degree to final examination and appoint a committee to examine him upon the recommendation of the department in charge of his work. Departments will recommend candidates for examination upon the following conditions:

1. The candidate must have pursued graduate studies and research for at least two academic years, one of which must have been spent at this University. The years of graduate study prior to his matriculation may be accepted in part fulfilment of this condition.

2. The candidate must have satisfied such preliminary examinations or requirements as the department may demand.

3. The candidate must have prepared a dissertation approved by the department and embodying the results of his researches. This dissertation must be printed either prior or subsequent to the final examination, as the department may require.

Students are advised to consult the divisional announcements and the administrative officers of the departments under which they are pursuing their studies, concerning the departmental requirements for admission to candidacy and for final examination.

Applications for the final oral examination for the degree of Doctor of Philosophy may be filed with the Dean at any time but not later than April 1 if the examination is to be held in the same academic year in which the application is filed. Examinations will be held not earlier than three weeks after the filing of the applications.

Each candidate for the degree of Doctor of Philosophy shall present a dissertation embodying the results of original investigation and research on some topic previously approved by the professor in charge of the major subject. When such dissertation has been approved, it shall be printed by the candidate, and 100 copies shall be delivered to the Librarian of the University before the degree is conferred. On the title-page of every such dissertation shall be printed the words, "Submitted in partial fulfilment of the requirements for the degree of Doctor of Philosophy, in the Faculty of —, Columbia University;" the full name of the author; the full title of the dissertation; the year and place of imprint, and, if a reprint, the title, volume, and pagination of the publication from which it was reprinted. There shall be printed and appended to each dissertation, in the form of a Vita, a statement of the place and date of birth of the author, of the educational institutions that he has attended, and a list of the degrees and honors conferred upon him, as well as the titles of his previous publications.

Under the Faculty of Political Science, the dissertation is required to be printed before the final examination is held.

Under the Faculties of Philosophy and Pure Science, the dissertation is not required to be printed until after the examination of the candidate. Students should, however, at least three weeks prior to their examination, deposit three typewritten copies of the dissertation in the Dean's office for the inspection of the examiners.

The general examination for the degree of Doctor of Philosophy will not be confined to the courses which the candidate has attended in Columbia University or elsewhere, or even to the field covered by such courses. The candidate is expected to show a satisfactory grasp of his subject as a whole and a general acquaintance with the broader field of knowledge of which this subject forms a part.

### *Master of Arts*

A student regularly admitted to the University under the Faculties of Political Science, Philosophy, and Pure Science and accepted as a candidate for the degree of Master of Arts will be recommended for the degree after the following requirements have been satisfied:

1. The candidate shall have registered for and attended courses aggregating not less than thirty tuition points, distributed over a period of not less than one academic year or its equivalent.

2. The candidate shall have satisfied the department of his choice that he has completed all the requirements specified by the department for the degree. These requirements may include the completion of courses and the assigned work in them, examinations, an essay, seminars, or other work prescribed by the department.

Students are advised to consult the divisional announcements and the administrative officers of the departments, under whom they are pursuing their studies, concerning the departmental requirements for the degree.

A candidate for the degree of Master of Arts in satisfying the requirement of residence may not offer in excess of fifteen tuition points courses which he also offers for a professional degree or for a certificate given in lieu thereof in any professional school belonging to the University or affiliated with it, nor may he offer undergraduate courses without the consent of the Dean.

Each candidate for the degree of Master of Arts must file a formal application for the degree on a blank provided for the purpose, to be had of the Registrar. If the degree is to be conferred in February, the application must be filed with the Registrar on or before December 1; if in June, on or before March 1; if in October, on or before August 1. The last named date applies to candidates who shall complete the requirements of residence and attendance in the Summer Session then in progress. Diplomas are issued on the last Wednesday in February, on Commencement day, and on the last Wednesday in October, corresponding, respectively, to the foregoing dates of application.

When an essay is required, it shall be submitted to the appropriate department at such time as the department may designate. If the essay is accepted, two typewritten or legibly written copies, together with a certificate of acceptance by the professor in charge, shall be deposited with the Registrar at least two weeks before the candidate expects to receive his degree. These copies must be written on "Paragon Linen" 11 x 8½ inches in size, 20-pound weight, 4½ wove, a space of 1½ inches on the inner margin being left free from writing. The title-page shall contain the words: "Submitted in partial fulfilment of the requirements for the degree of Master of Arts in the Faculty of—, Columbia University."

An undergraduate who, at the beginning of any Session, is within twelve points of a Bachelor's degree may be permitted, with the approval of the appropriate Deans, to

register for graduate courses not in excess of four tuition points with a view to offering them in part fulfilment of the requirement for residence for a second degree; if within eight points, courses not in excess of eight tuition points; if within four, not in excess of twelve. If such student afterwards matriculates as a candidate for the degree of Master of Arts, the graduate courses previously taken by him under this provision will be accepted in part fulfilment of the residence requirement for the degree.

On final certification by the Dean of the appropriate Faculty that all official regulations have been complied with, a candidate shall be recommended to receive the degree of Master of Arts for the satisfactory completion within a period of five years of an approved curriculum.

*Master of Laws*

Any student who has been graduated from an approved college or scientific school of collegiate rank, or who has successfully completed three years of undergraduate study in an approved college or scientific school, such course of study including satisfactory courses in Economics and in English and American History, and who has also successfully completed three years of study in an approved law school, and who shall thereafter during one year of residence at Columbia University satisfactorily complete a course of study approved by the Dean of the Faculty of Law shall be entitled to be recommended for the degree of Master of Laws.

*Master's Degree in Education and Science*

Candidates for the degree of Master of Arts in the Department of Education are under the jurisdiction of the Faculty of Education at Teachers College. (See the current *Announcement* of the Faculty.)

The degree of Master of Science is awarded as a graduate professional degree under the Faculty of Applied Science, the Faculty of Practical Arts, the School of Architecture, and the School of Business. For information with regard to candidacy for this degree, application should be made to the Dean or Director of the Faculty or School concerned.

For other officers who may give instruction to students of Barnard College, consult the several departmental statements.

Delegates to the University Council (see page 6).

*General Statement.* In 1883 the Trustees of Columbia College offered degrees to women who should be able to pass the necessary examinations, without, however, providing instruction for them. The resulting system, called the Collegiate Course for Women, proved unsatisfactory to both parties. Barnard College was, therefore, organized in 1889 to provide instruction for women which should be identical with or equivalent to that provided by Columbia for men.

For eleven years it duplicated for women as far as possible the curriculum of Columbia College, and also registered for graduate work under the University Faculties women who held the bachelor's degree from institutions of good standing. Its instructors were members of the University staff. Examinations for entrance, those given in course, and those for degrees, were conducted by Columbia University. During the first three undergraduate years separate instruction was given to women; in the senior year they were admitted to certain courses in the University. Graduate students attended many courses at the University under the Faculties of Philosophy, Political Science, and Pure Science, the laboratory work in science being done at Barnard College.

The numerical growth of Barnard College made inappropriate, however, the informal arrangement for instruction which was the natural method at the outset, and it became necessary to recognize formally the status which had gradually come into existence. An agreement was accordingly entered into in January, 1900, by which Barnard was included in the University system. Barnard is now an independent college for women with a corporation and a faculty of its own vested with all the powers commonly belonging to such bodies. At the same time, it shares the library, the instruction, and the degrees of Columbia University.

A more exact idea of the relations between Barnard College and Columbia University and also of the relations between Barnard College and Teachers College is to be found in the current *Announcement of Barnard College*. This may be obtained without charge upon application to the Secretary of the Committee on Admissions of Barnard College.

*Admission.* See Undergraduate Entrance Requirements, page 234. More detailed information will be found in the *Announcement of Barnard College*.

*Advanced Standing.* See the "Requirements for Admission to Advanced Standing in Columbia College," page 239.

In addition, the final determination of credits of students admitted by transfer lies with the Committee on Transfers, which reserves the right of readjusting credit at any time.

No applicant may enter the senior class as a candidate for a degree after October 15 in any year, and no student will receive a degree who has resided less than two full sessions (winter or spring) at Barnard College.

*Special Students.* Women who wish, without working towards a degree, to make a serious study of some subject or group of subjects, may, with the approval of the Committee on Admissions, enter Barnard as non-matriculants. They need not pass formal entrance examinations, but they must submit satisfactory credentials in regard to character and qualifications for the courses they wish to take.

Candidates for admission as non-matriculants must be at least 18 years of age. They may not pursue merely elementary courses. They must not, within 10 months of the time of application, have been rejected or become deficient as regular students.

They will be held to the observance of the same regulations as to attendance, examination in course, proficiency and deficiency as regular students. They are also subject to the usual health regulations.

They are entitled to a formal statement as to the satisfactory completion of the work that they have taken. They may, in view of a satisfactory record in college courses, be transferred by the Committee on Instruction to the matriculated basis as candidates for a degree.

*Matriculation, Registration, Fees.* Detailed information regarding matriculation, registration, and fees will be found in the current *Announcement of Barnard College*.

*Residence Halls.* See page 92.

*Program of Studies.* Upon completion of a curriculum arranged according to the plan to be described below, the student is recommended by the Faculty of Barnard College for the degree of Bachelor of Arts.

In addition to the foregoing requirements students must have such sound acquaintance with one other foreign language, ancient or modern, as would be equivalent to not less than 3 entrance units in the language, such proficiency to be determined by entrance examinations, by special tests, or by specific college courses, recommended for that purpose by the departments concerned under the approval of the Faculty.

| Physical Education, prescribed for all students during their period of residence.              |       |

*Program of Studies for degree with certificate in science or mathematics.* This program is the same as the foregoing except in the following respects:

A major subject of 28 points (instead of 24) in one of the following natural sciences: astronomy, botany, chemistry, geography, geology, mineralogy, physics, experimental psychology and zoology or in mathematics, and  
 Two minor subjects of at least 12 points each, one in a subject allied to the major and one in a diverse subject, both to be chosen from the foregoing list with the addition of anthropology.  
 Additional grouped work in science or in mathematics, or in science and mathematics, amounting to at least 8 points.

Exceptionally well equipped students with pronounced interest in any subject, may be allowed to substitute for the regular prescribed curriculum a special course of study in that and closely related subjects. Entrance into this course is optional with those students who are eligible.

Students may be admitted to this course: rarely, and only in cases of exceptional maturity and promise, at entrance; usually, as a result of conspicuous ability in college work, at the beginning of the sophomore or junior year; provided they meet in September such tests as the Committee on Instruction may determine.

The appropriate department then takes charge of the student's work and, subject to the approval of the Faculty, arranges the course to be pursued for a degree with honors. A sound reading knowledge of French and German is required before graduation, except in the departments of modern foreign languages, which may substitute other modern languages at their discretion. Previous to the senior year the manner of testing proficiency rests with the department in charge. In the senior year all regular examinations are omitted, and at the end of the year every honors student must pass a comprehensive examination in her subject as a whole. Honors students are exempt from the technical requirement of 120 points, from regular class attendance and from the usual system of grading, but not from the customary supervision of the Department of Physical Education.

*Preparation for Professional Schools.* Students who intend to transfer to professional schools are of two classes, those who leave Barnard at the end of the sophomore year, without candidacy for the Bachelor of Arts degree, and those who at the end of the junior year wish to take advantage of the "combined course," counting the first year of an approved professional school in place of the senior year at Barnard.

Barnard students intending to transfer to professional schools without candidacy for the degree of Bachelor of Arts are required to take English A, English C, Physical Education throughout their stay at Barnard, and such other courses as are appropriate in preparation for the professional school to which the transfer is to be made.

Barnard students intending to enter approved professional schools after three full years of work at Barnard College may substitute the first year of the professional schools for the senior year at college and, on satisfactory completion thereof, become candidates for the degree of Bachelor of Arts, provided that, before such transfer is made, 86 points of work, including all prescribed work, 18 points of the major subject and electives distributed according to certain rules, have been satisfactorily completed.

*University Courses.* Certain courses in the School of Architecture and the Department of Music and in Teachers College are open to regular students registered in Barnard College. Certain graduate courses in Columbia University under the Faculties of Political Science, Philosophy, Pure Science, and Education, and other courses in the New York School of Social Work are open to specially qualified Barnard seniors.

After two years of collegiate work in Barnard a student may transfer without examination to the School of Architecture as a candidate for the degree of Bachelor of Architecture, to Teachers College as a candidate for the degree of Bachelor of Science in Practical Arts, to the School of Business as a candidate for the degree of Bachelor of Science, or to the School of Journalism as a candidate for the degree of Bachelor of Literature; after three years (or two in exceptional cases) to the College of Physicians and Surgeons as a candidate for the degree of Doctor of Medicine.

Detailed information in regard to these opportunities will be found in the announcements of Barnard College and the other schools concerned.

*General Statement.* Teachers College, founded in 1888, and chartered by the regents of the University of the State of New York in 1889, became, in 1898, a part of the educational system of Columbia University. The President of Columbia University is President, *ex-officio*, of Teachers College and the College is represented in the University Council by its Dean and representatives elected from its two Faculties. The College, meanwhile, maintains its separate corporate organization, and its Board of Trustees continues to assume entire financial responsibility for its maintenance. In 1912 the Trustees reorganized Teachers College, establishing the School of Education with the Faculty of Education, and the School of Practical Arts with the Faculty of Practical Arts. In addition to these professional schools, Teachers College conducts several schools below college grade, the Horace Mann Schools, the Speyer School, the Lincoln School, and the Quaker Grove School.

The central group of the Teachers College buildings occupies the block directly north of the University Campus, bounded by 120th and 121st Streets, Amsterdam Avenue, and Broadway. It includes the main Teachers College Hall, containing equipment for administration and instruction and the Teachers College Library—the educational library of the University—adjoined by Milbank Memorial Hall, housing a number of academic and technical departments and containing the Memorial Chapel; by Macy

Hall, with its equipment for fine arts and industrial arts; and by Grace Dodge Hall for the department of household arts. Frederick Ferris Thompson Memorial Hall, for the department of physical education, connects Milbank Hall on the west with the main building of the Horace Mann School. To the east in this group of buildings is Whittier Hall, one of the residences for the women students of the College. There is also a two-story office and classroom building, known as the Annex, on 121st Street between Macy Hall and the Horace Mann School. There are now under construction on 120th Street adjoining the main Teachers College Hall, a library building, known as Russell Hall, and a new power plant; also on 121st Street, a seven-story structure which will provide for an extension of the facilities of Grace Dodge Hall and for a large dining hall.

Two apartment houses have recently been purchased and converted to dormitory uses. One of these, Bancroft Hall, is on the north side of 121st Street, opposite Grace Dodge Hall; the other, Seth Low Hall, is situated at the corner of 121st Street and Morningside Drive.

The new buildings of the Horace Mann School for Boys, a country day school, are located near Van Cortlandt Park. The Speyer School is situated a short distance north of the College, on Lawrence Street, near Amsterdam Avenue. The Lincoln School, the new experimental school of Teachers College, which was opened in 1917, occupies a new building on 123rd Street, between Amsterdam and Morningside Avenues, which was especially constructed to meet the needs of this school.

*School of Education.* The School of Education affords opportunity for the advanced study of educational psychology and sociology, the history and philosophy of education, educational administration, vocational, religious, and rural education, and the various aspects of secondary, elementary, and kindergarten education. It also provides professional training, both theoretical and practical, for teachers of both sexes for secondary, grammar, and primary schools, and kindergartens; and offers preparation for advanced students for work as principals, supervisors, and superintendents of schools; as heads of academic or educational departments in normal and teachers' training schools, and of educational departments in colleges and universities. The School of Education is thus a professional school of Columbia University for the study of education and the training of teachers, taking academic rank with the Schools of Law, Medicine, Mines, Engineering, and Chemistry.

*Curricula.* Since July 1, 1914, the School of Education has been organized on a graduate basis offering graduate curricula for advanced students leading to the Teachers College diplomas in teaching, and to the degrees of Master of Arts and Doctor of Philosophy with a major in education. Such curricula provide work in educational psychology, the history and the philosophy of education, educational sociology, educational administration, vocational, religious, and rural education, scouting and recreational leadership, secondary education, elementary and kindergarten education, and in research in the methods of teaching the various academic subjects, supplemented by courses in other parts of the University. Teachers College diplomas are awarded to those who demonstrate professional fitness as instructors in education in colleges and universities, as supervisors, principals, and superintendents of schools of all grades, as heads of academic or education departments in normal and teachers' training schools, and as teachers in secondary schools. Courses in education may also be counted as minor subjects toward the advanced degrees, by students primarily registered in some other part of the University.

*The Horace Mann Schools,* maintained by Teachers College, with a complete organization covering the work of the kindergarten, elementary school, and junior and senior high school, offer exceptional advantages for the study of the practical work of

teaching and for the investigation of educational problems. These schools now have an attendance of nearly 1,200 pupils.

*The Speyer School*, in connection with Public School No. 43, is conducted as an experimental junior high school under the Board of Education in New York City, in cooperation with Teachers College.

*The Lincoln School*, established in 1917, is maintained by the General Education Board in cooperation with Teachers College. The school exists for the purpose of conducting modern experiments in education.

*The Quaker Grove School*, located in a typical farming community in Warren County, New Jersey, was established in 1921 for the purpose of experimentation in the field of rural education.

*School of Practical Arts.* The School of Practical Arts is a professional school of the University ranking with the Schools of Education, Law, Medicine, Engineering, etc., and devoted to the training of teachers and other workers in such technical fields as household arts, industrial arts, fine arts, music, physical education, and nursing.

Since its reorganization in 1912, the School has offered to both men and women, who have completed a secondary school course, a program of study four years in length, equivalent in standards of admission and graduation to the traditional college course in letters and science. After June 30, 1923, the minimum requirement for matriculation in the School will be one year of approved study in college beyond high school, and after June 30, 1924, two years of collegiate study beyond high school.

*Curricula.* The curricula of the School lead to the degrees of Bachelor of Science and Master of Science, conferred by Columbia University, and to the Teachers College diplomas for teachers and supervisors of various lines of practical arts. In cooperation with the Faculty of Education, the Faculty of Practical Arts conducts graduate work in the educational aspects of practical arts leading to the degrees of Master of Arts and Doctor of Philosophy.

For detailed information, see the current *Announcement of the School of Practical Arts*, which may be had from the Secretary of the University.

*The Institute of Educational Research* was established in 1921 to promote the scientific study of education in cooperation with the several departments of the College and with other institutions interested in investigation and research. It is organized, under an Administrative Board, in three divisions, viz.: (1) Division of Educational Psychology; (2) Division of School Experimentation; (3) Division of Field Studies. The Board also administers special funds for scientific research in several fields of practical arts. The staff of the Institute is drawn from available experts wherever they may be found and assignments made for limited periods on specific undertakings.

*The International Institute* of Teachers College was established in 1923 as part of the work of the College for the professional training of foreign students and for the encouragement of research and investigation of school systems and methods of education in other lands. It is organized under an Administrative Board consisting of the Dean of Teachers College, the Director of the Institute and the Associate Director of the Institute.

# SCHOOL OF ARCHITECTURE

The School of Architecture of Columbia University is a professional school for men and women. It was founded in 1881, under the direction of the late Professor William Robert Ware, as a department of the School of Mines (now the Schools of Mines, Engineering and Chemistry), and was in 1912 made an independent school of the University.

It receives two classes of students: (1) Candidates for the degree of Bachelor of Architecture, who must give evidence of having completed two years of academic study in a recognized college. The curriculum offered to such students is of indeterminate duration but may generally be covered in four years. (2) Candidates for the degree of Master of Science in Architecture. Candidates for this degree must be graduates of this School of Architecture or of a school of architecture maintaining equivalent courses, and are required to spend not less than one academic year upon work assigned by the Administrative Board of the School of Architecture.

*Building and Equipment.* In 1912 the School of Architecture took possession of its present quarters in Avery Hall, erected in memory of the late Samuel P. Avery, a benefactor of the University, and of his son, the late Henry O. Avery, an architect, to accommodate the Avery Architectural Library and the School of Architecture. Four floors of the building are occupied by the School.

The Avery Architectural Library, consisting of about 25,000 volumes relating to architecture and allied arts, occupies the ground floor of the building, and is open to the public daily (except Sundays and holidays and during a period of six weeks following the Summer Session) from 9 a. m. to 6 p. m. and from 7 to 10 p. m. Its material is available for the purposes of study and illustration in the School, whose students are freely admitted to its alcoves without restriction upon the use of books and documents for drawing, tracing, and photographing.

In addition to this the School possesses, in its own departmental library, a collection of about 13,000 photographs and several hundred books, a classified library of many thousands of prints and plates, and a large number of original drawings from various sources. The equipment of illustrative material furthermore comprises 16,000 lantern slides of architectural subjects, a fine collection of casts of architectural details, including a large number from ancient and modern Roman buildings, the gift of the late Charles F. McKim, and several valuable models of buildings and of structural details.

Periodic exhibitions of both student and graduate work are held by the School of Architecture. The current work of students in residence, illustrating progressive accomplishments during four years, is hung in the exhibition room and corridors of Avery Hall.

Important collections of sculpture, painting, engraving, and the minor arts are frequently shown in the Avery Architectural Library.

The Willard collection of architectural casts and models in the Metropolitan Museum of Art is open every day and two evenings in the week, and is very useful for illustrating the historic styles. Sketching cards granting certain additional privileges in the Museum are issued to students in residence.

The other collections of the Metropolitan Museum of Art and those of the American Museum of Natural History furnish much admirable illustrative material; while the

building activity of the city forms a chronicle of architectural progress in design and construction, governmental, domestic, monumental, ecclesiastic, and commercial.

*Admission.* Except by special action of the Committee on Admissions, regular students under eighteen are not admitted. For regulations governing admission to the course for the Bachelor's degree in Architecture and for the degree of Master of Science in Architecture, see Table of Contents.

In general, all courses in the School of Architecture begin in September and run through the year, although the two Sessions are separately rated. It is, therefore, extremely difficult to make adequate arrangements for students who wish to enter in February.

Students desiring to enter with credit for courses pursued in other institutions must make application in writing to the Director of the School of Architecture in time to reach him one month before the beginning of registration (see Academic Calendar). The general regulations as to documents to be submitted and as to the acceptance of certificates are the same as for the Schools of Mines, Engineering, and Chemistry.

*Fees.* For summary of fees, see Index.

*Fellowships and Scholarships.* For information with regard to fellowships, scholarships and prizes, see Index.

*Examinations.* Regular examinations in each course are held at the end of each half-year. All other examinations, except examinations for admission to advanced standing, are special examinations, for which the statutory fee of \$6 is charged (see page 87). For the dates of the various examinations see the Academic Calendar. Absence from any regular or delinquent examination for which a student is registered is regarded as a failure. A student who fails to attend any mid-year examination will be excluded from the second term in that subject, except for reasons of weight. Those for whom exceptions are made will be required to take the corresponding deficiency examinations during the stated September deficiency examination period.

Students who do not pass or are debarred from a regular mid-year or final examination must remove such deficiency at the September delinquent examinations, failing which they must repeat the course concerned. Students will be debarred from examinations for excessive absence from lectures or failure to complete collateral work. They may for the same reasons be excluded from any course at the middle of any term.

*Bachelor of Architecture.* 1. Candidates for admission to this course must give evidence of having successfully completed the equivalent of two years of academic studies in a recognized college. Mathematical studies pursued in anticipation of those prescribed in the School of Architecture may be included in such collegiate preparation, and students are advised to carry these studies if possible through the Calculus. The required collegiate preparation must include the equivalent of the elementary French specified for admission to Columbia College. Candidates must also show a practical knowledge of freehand drawing.

2. In case of studies pursued elsewhere than in a recognized college, and offered by the candidate in lieu of any part of the college preparation, the Administrative Board of the School will determine each equivalent upon its merits.

3. Through the cooperation of the Staff of the School of Architecture and the Committee on Instruction of Columbia College, a program for a combined course of six years has been arranged. Its object is to enable students in Columbia College to begin the study of architecture early in their college course and to obtain unbroken training in this field until they receive the professional degree. Upon completing the fourth year of this curriculum students receive the degree of Bachelor of Arts and at the end of the whole course, the degree of Bachelor of Architecture. The combined course has decided advantages in soundness of preparation and breadth of culture and it is earnestly

commended to young men in preparatory schools who look forward to the study of architecture. Copies of this program may be obtained on application to the Secretary of the University.

*Program of Studies.* A student receives his degree when he has satisfied the requirements of the courses scheduled below.

Not more than 16 points, exclusive of Elements of Architecture or Design, may be taken in any session, except by authority of the Committee on Instruction of the School.

In connection with this schedule of required work it should be understood that students credited with advanced standing on the basis of work done in other institutions, as well as others especially qualified, may in any year undertake in part the work of more advanced years subject to the restriction stated above.

Certain additional courses under the Faculties of Applied and of Pure Science may also be elected by qualified students.

Students in the School of Architecture who desire to be candidates for the degree of Master of Arts or Doctor of Philosophy are subject to the general provisions for those degrees (see Table of Contents).

The degree of Master of Science is awarded as a graduate professional degree in the School of Architecture. For information with regard to candidacy for this degree application should be made to the Director of the School.

Graduates of this School and of other schools of architecture maintaining equivalent courses are admitted to the graduate courses in Design and Construction, whether candidates for the higher degrees or not.

The courses in architecture open to candidates for the higher degrees are those numbered above 100 in the departmental statement.

Evening courses in Architecture leading to a certificate are offered under University Extension.

*General Statement.* The College of Pharmacy of the City of New York, founded in 1829, chartered in 1831, and recognized in 1879 by the Regents as part of the University of the State of New York, became a member of the educational system of Columbia University on July 1, 1904. The President of the University is *ex-officio* President of the College of Pharmacy, and the College is represented in the University Council by its Dean, who is appointed by the Trustees of the College of Pharmacy on the nomination of the President. The College, however, maintains its separate corporate organization, and its Trustees continue to provide for its financial support.

The College is situated at 115 West 68th Street, near Columbus Avenue, in an especially well-equipped building erected in 1894. A new building, now in process of erection, will double the teaching facilities of the school.

The College of Pharmacy is thus the professional school of Columbia University for Pharmacists, Pharmaceutical Chemists, Bachelors of Science in Pharmacy, and Doctors of Pharmacy and, as well, a valuable addition to the University's resources for teaching and research in botany, chemistry, pharmacy, and materia medica.

*Admission.* Candidates for admission will be examined either at the Regents' examination, or at the January and September entrance examinations of Columbia University, or of the College Entrance Examination Board, held in June of each year (see page 234).

*College Course.* The College Course of two years leading to the degree of Graduate in Pharmacy is open only to persons holding the Qualifying Certificate for a Pharmacy Student, granted by the State Education Department for seventy-two Regents' counts or their equivalent.

*University Course.* The University Course, leading in three years to the degree of Pharmaceutical Chemist is open only to persons who have completed a four-year approved course in a registered high school. The course leading in four years to the

degree of Bachelor of Science in Pharmacy is open only to persons who have completed a four-year approved course in a registered high school of New York State or who passed the Entrance Examinations of Columbia University or of the College Entrance Examination Board or who have complied with the new method based on psychological tests.

*Program of Study.* 1. A College Course, consisting of two years, leading to the degree of Graduate in Pharmacy, conferred by the College independent of the University, and qualifying the graduate to meet any examination for the position of licensed pharmacist.

The work undertaken is as follows: First year, physics, general and pharmaceutical chemistry, analytical chemistry; practical pharmacy, dispensing pharmacy, botany, microscopy, physiology and posology. Second year: organic chemistry, inorganic and organic pharmaceutical chemistry, and analytical chemistry, practical pharmacy, dispensing pharmacy, materia medica, toxicology, macroscopical pharmacognosy, microscopical pharmacognosy, and pharmaceutical accounting and jurisprudence.

2. A University Course of four years, the first three of which lead to the degree of Pharmaceutical Chemist, conferred by the University. The work undertaken in this course differs from that of the College Course in being of a somewhat more advanced character, and in being pursued through the full academic year. It includes instruction in laboratory physics, in addition to the studies of the College Course. The fourth year leads to the degree of B.S. in Pharmacy. The work for this year includes micro-analysis, plant analysis, bacteriology and physiological chemistry, as well as advanced work in all departments.

3. A third or Graduate Course of two years leads to the degree of Doctor of Pharmacy.

The work of the Graduate Course is arranged on the same plan as that leading to the degree of B.S. in Pharmacy, and occupies not less than forty hours weekly throughout the entire academic year, a fraction of this work being elective.

The purpose of this course is the training of men and women for the higher duties of pharmaceutical and allied service, such as pharmaceutical and commercial analysis, food and drug inspection, and commissionship and pharmaceutical teaching.

The baccalaureate degree, secured on equal terms with that conferred in other professions, confers equal privileges therewith, except as to the number of units of work performed. A holder of this degree desiring to transfer his activities to another profession, or to study for a higher degree, will be credited in such course with the number of units pertaining to his Bachelor of Science in Pharmacy Course, except those for professional studies, and his standing up to this point is the same as that secured in other baccalaureate departments.

4. A Summer Laboratory Course of twelve weeks is provided for those who, for any reason, require training in special subjects.

5. Evening courses of instruction are offered for the benefit of special students, and for those regular students who for any reason may desire the instruction. These courses cannot, at least for the present, take the place of any instruction of the regular course leading to a degree. Certificates will be awarded to those who successfully pursue these evening courses.

6. A number of special courses of instruction have also been established, partly for the benefit of those regular students who desire, for any reason, to specialize in certain lines of work, and partly to provide instruction in individual departments for those who do not desire to take the full course. Certificates, but not diplomas, are awarded to such students. These special courses of instruction are in pharmacognosy, chemical analysis, advanced inorganic and organic chemistry, and practical pharmacy.

*Method.* During the first two undergraduate years the instruction occupies three days of the week, the alternate days being free for practical experience in the pharmacy. This arrangement provides a means of paying the expenses of a majority of students. During the third and fourth years, instruction occupies four days weekly.

In addition to lectures and laboratory work, a series of recitations or quizzes, by a corps of qualified instructors, is given to the classes, in small sections.

*Scholarships and Prizes.* For information with regard to scholarships and prizes, see Index.

# SCHOOL OF JOURNALISM

ADVISORY BOARD (See page 13)

ADMINISTRATIVE BOARD (See page 10)

Delegate to the University Council (See page 6)

*Aims.* The aim of the School of Journalism is to train for and attract to the journalistic profession young men of character and ability, and to help those already engaged in the profession to acquire the highest moral and intellectual training. It is the object of the School "to make better journalists, who will make better newspapers, which will better serve the public."

*Building.* The building for the use of the School of Journalism is on the southeast corner of Broadway and 116th Street; the external dimensions are 208 feet 8 inches by 55 feet 10 inches, with a height of five stories and basement. The entrance is on the south front, consisting of three doors grouped under a portico and opening into a spacious vestibule, in which are placed medallions of journalists, a bust of the late Joseph Pulitzer, and a memorial inscription. The vestibule gives access to the administrative offices, the Junior City Room, and a large lecture hall on the main floor; the library and newspaper reading-room are on the next floor; on the upper floors there are the Senior City Room, laboratories, typewriter rooms, small lecture-rooms, class rooms, and studies, numbering about thirty in all, and affording a total seating capacity of about 2,200.

*Admission.* Candidates for admission to the first professional year must be at least eighteen years of age at entrance, and correspondingly older for advanced standing. A certificate of good moral character must be presented and, in the case of students from other colleges, of honorable dismissal. Applicants for regular admission must have completed at least two years of college work, including:

- (a) Two years of college English with regular practice in writing.
- (b) One year of college French in addition to three years' French in High School or its equivalent. Another modern language may be substituted by permission.
- (c) One college year of Natural Science.
- (d) One college year of Economics or Government.
- (e) One college year of Modern European or American History.

All candidates are required to pass the foreign language and typewriting test.

*Advanced Standing.* Candidates for admission to advanced standing, upon the basis of certificates of transfer from other colleges, should fill out the appropriate application blank, to be obtained from the Secretary of the University; and file it with the Director of University Admissions before September 1.

*Non-matriculants.* Non-matriculated students may be admitted to the first professional year of the School, if they submit evidence of sound training in History, Economics, Politics and other fundamental subjects, of maturity (they must be at least 21 years of age), of experience in professional writing, or of marked fitness for it. If they take the work prescribed for the degree of Bachelor of Literature for two years, they will be eligible for the certificate of proficiency. Applications should be made before September 1 to the Director of University Admissions on blanks to be obtained from the Secretary of the University

*Language Test.* The ability of students to read a French newspaper will be tested on their entrance to professional studies. Another modern language may be substituted with the consent of the Director of Admissions, to whom application for permission to sit for the test should be made before September 1.

*Typewriting.* No student unable to typewrite is admitted.

*Registration, Fees, Scholarships and Prizes.* For information on these subjects consult Index.

*Program of Study.* The satisfactory completion of the following studies, together with the successful passage of a language test in French, consisting of a typewritten examination in sight translation of extracts from current French newspapers, is required for the B.Lit. degree. Another modern language may be substituted, with the consent of the Director of Admissions. This examination must be passed before admission to the second professional year.

Candidates for the degree who wish to specialize in some branch of journalism or to continue particular subjects will be allowed to substitute courses of equivalent credit for any of those of the second professional year on submission to the Director of an approved program, to be filed before the beginning of the year. In preparing such a program they will have the assistance and advice of the members of the staff of the School.

Subject to the foregoing regulations, the satisfactory completion of the following courses, together with the language test above mentioned, is required for the B.Lit. degree or for the certificate of proficiency:

# SCHOOL OF BUSINESS

ADMINISTRATIVE BOARD (See page 10)

Delegate to the University Council (See page 6)

*General Statement.* The School of Business offers a complete professional course in business to properly qualified students, both men and women. It is the aim of the course to afford a sound knowledge of fundamental business facts and principles in addition to such practical training in business methods as a school can furnish. The courses are designed especially for the college student who at the close of his sophomore year may desire to secure a more thorough and exact knowledge of the principles, organization, and methods of the commercial, industrial, and financial world than is furnished in other departments of the University, and for those persons already engaged in business who desire to obtain deeper insight into the problems of their respective vocations as well as broader knowledge of allied fields of business activity. A special object, also, is to lay a thorough foundation for the state examination for the certificate of certified public accountant.

*Curriculum.* The curriculum consists of a two-years' series of courses based upon two years of college study leading to the degree of Bachelor of Science with an additional year leading to the degree of Master of Science, or a two years' series of courses based upon four years of academic work leading to the degree of Master of Science.

*Students.* The following classes of students will be provided for: (1) graduate students, candidates for the higher degrees; (2) students who have spent two years in Columbia College or Barnard College or in some other college of equivalent rank and are candidates for the degree of Bachelor of Science; (3) graduates of high school who have completed in University Extension work equivalent to that offered by Columbia College or Barnard College in the first two years; (4) students who have completed two full years of satisfactory collegiate work in an acceptable college and desire to take special courses, not as candidates for a degree; (5) students over twenty-five years of age actively engaged in business and qualified to undertake certain courses, who may be admitted as special students but not as candidates for a degree.

*Admission.* 1. *To the one year course leading to the degree of Master of Science.* Students must hold the Bachelor of Science degree in business or its equivalent.

2. *To the two-year course leading to the degree of Master of Science.* Students must hold the Bachelor of Arts degree or its equivalent.

3. *To the two-year course leading to the degree of Bachelor of Science.* Students must have completed two years or more in Columbia or Barnard College or an equivalent course in some other institution of similar standing. During this period the student should take courses aggregating 64 points if taken in Columbia College or Barnard College, or two full years of work in another acceptable college, including two years of English, two years of French or German or Spanish or their equivalent and at least one year each of history, economics, economic geography, and mathematics. Beginning with the fall of 1923 a course in elements of business administration will be required for entrance to the School of Business, making the total number of required points 68.

Students intending to select a secretarial program in the School of Business should in the two-year period of collegiate study take courses aggregating 64 points including two years of English composition, one year of English literature, two years of French,

German, or Spanish, one year each of history and economics, and one year of advanced mathematics or of economic geography. The requirements in elements of business administration will go into effect for secretarial students, also in 1923, making the total number of required points for entrance 68.

For reasons of weight and on the approval of the Director, students will be allowed to make good during their first year in the School of Business certain courses usually required in the preliminary years.

4. *Special students.* Students who have completed two full years of satisfactory collegiate work in an acceptable college may be admitted to special courses of study.

5. *Non-matriculated students.* Students who are over twenty-five years of age and who are actively engaged in business may be admitted to special courses of study, but such students cannot register as candidates for the degree of Bachelor of Science. They may not take more than one or two courses in any session.

6. *Candidates for the certificate.* Graduates of approved colleges may enter the School of Business for a year of secretarial study.

#### PROGRAM OF STUDIES

*First Year.* The first year of the School of Business corresponds to the third year of the college course and is, therefore, open to students who have covered two years of collegiate subjects.

The following courses, aggregating not less than 32 points, and electives to make a total of not more than 38 points, are required of candidates for the degree of Bachelor of Science and, with the exception of Business law, must be taken in the first year:

First year accounting

Economic history of the United States and public aspects of business

Elements of business administration (to be taken for credit in the School of

Business by students entering during the academic year 1922-1923)

Banking and business

Business law

French or German or Spanish.

*Second Year.* Students of the second year of the School of Business are permitted to elect their entire program, subject to the approval of the Director. They should have gained a satisfactory working knowledge of accounting before completing the second year of the School. This will ordinarily require two years of attendance upon Business 23-24 and Business 25-26. Those who wish a general course in business may make a selection which stresses no particular branch. On the other hand, those who desire to specialize in some part of the field are afforded an opportunity to do so.

*Third or Graduate Year.* In connection with the work of the third or graduate year advantage will be taken of the peculiar opportunities due to the location of the School in the City of New York. Every effort will be made to bring properly qualified students into close contact with modern business problems and with best business practice as developed in the large enterprises located in the city. Only the courses numbered above 100 and marked Credit II, IX, may be taken for credit toward the Master's degree. Graduate instruction will emphasize research problems. Each student will be expected to work out, under direction of a member of the staff, some independent investigation which will have an important bearing not merely on his own knowledge of business administration and its relation to the economic life of the community, but will also contribute in some degree to the sum of knowledge of business activity and to the improving of business processes. It is a prime purpose of the School to stress this phase of its work.

*Secretarial Studies.* Students in Secretarial Studies are required in the two years of the School of Business leading to the degree of B.S. to take courses in elements of business administration, business law, secretarial bookkeeping, secretarial correspondence, and typography, aggregating not less than 22 points, and electives from the School of Business to make not less than 30 points. In addition they must satisfy the Administrative Board that they have a mastery of stenography and typewriting, for which a maximum of 8 points academic credit will be allowed, making a total of 60 points. A certification of proficiency in a foreign language is also required.

*Certificate in Secretarial Studies for College Graduates.* Graduates of approved colleges who have been accepted as candidates for a certificate are required to take, during the year, the following courses, Stenography *et-2*, Typewriting *et-2* for which academic credit of 8 points will be granted, and electives from the School of Business or University Extension amounting to 14 points. See *Announcement of Secretarial Studies*.

*Degrees.* Students who complete the undergraduate work of the School of Business are eligible for the degree of Bachelor of Science. Those who complete the requisite graduate work are eligible for the degree of Master of Science. The program of study to be pursued in satisfaction of the requirements for the degrees is as follows:

*Bachelor of Science.* The work required for this degree consists of two years of college courses and a program of 60 points in the School of Business, each point representing the satisfactory completion of work requiring one hour a week for the Winter and Spring Sessions. This requirement in the School of Business may be satisfied by two years' residence, and is met for the first year by the prescribed program indicated on page 285, and electives to make a total of not more than 38 points. The second year is entirely elective.

No candidate for the degree may take less than twelve nor more than nineteen hours per week in either the Winter or the Spring Session. Students registered in the School of Business may, on the approval of the Director, obtained in advance, receive credit for courses successfully completed in the Summer Session or in University Extension. The maximum credit allowed toward the degree for work taken in any one Summer Session is eight points, provided that no more than six points be credited to any student who received a mark below C in any course of the previous Session of the School. Students must have at least a year of residence in the School of Business to become candidates for the degree. Students entering from other institutions with advanced standing must take at least thirty points in the School of Business.

Residence in the School of Business is defined as registration for and attendance upon the courses offered in the School of Business aggregating not less than thirty tuition points distributed over a period of not less than one academic year or its equivalent.

Properly qualified students may, on the approval of the Committee of the Council on University Undergraduates, count Extension courses toward the new B.S. degree in general studies established for University undergraduates. For additional information address the Secretary of the University.

*Master of Science.* A student regularly admitted to the University in the School of Business, who has already completed a two-year course of study equivalent to that offered in the School of Business for the degree of Bachelor of Science preceded by a two year college course, or who has obtained a degree from an acceptable college or university, supplemented by one year of work (not less than thirty points) in the School of Business or in another acceptable school of business, including fundamental courses in the fields of economics, corporation finance and banking, marketing, accounting, statistics and such other subjects as the adviser of the students and his associates may consider desirable, will be accepted as a candidate for the degree of Master of Science,

and will be recommended for the degree after the following requirements have been satisfied:

1. The candidate shall have registered for and attended courses aggregating not less than thirty tuition points distributed over a period of not less than one academic year or its equivalent (and approved as the residence requirement for the degree by the Director or other designated officer).

2. The candidate shall have satisfied a comprehensive examination on the subjects of his graduate study, to be prepared by a committee of the teaching staff.

3. The candidate shall have prepared a satisfactory essay under the direction of a designated officer of the teaching staff, the subject to be approved at the beginning of the candidate's residence. The essay shall present the results of original investigation.

4. The essay, when completed, shall be submitted to a committee of three, designated in each case from the staff of the School. If the essay is accepted, two type-written copies together with a certificate of acceptance by the committee in charge shall be deposited with the Registrar at least two weeks before the candidate expects to receive his degree. One of these copies shall later be deposited in the Library of the School of Business. These copies must be written on Paragon Linen, 11 x 8½ inches in size, 20-pound weight, 4½ wove, a space of 1½ inches on the inner margin being left free from writing. The title page shall contain the words: "Submitted in partial fulfillment of the requirements for the degree of Master of Science in the School of Business, Columbia University."

5. An undergraduate of the School of Business who, at the beginning of any Session, is within twelve points of a Bachelor's degree may be permitted, with the approval of the Director, to register for graduate courses not in excess of four tuition points with a view to offering them in part fulfillment of the requirements for residence for a second degree; if within eight points, courses not in excess of eight tuition points; if within four, not in excess of twelve. If such student afterwards matriculates as a candidate for the degree of Master of Science, the graduate courses previously taken by him under this provision will be accepted in part fulfillment of the residence requirement for the degree.

6. Although the residence requirement and the essay shall have been completed satisfactorily, the degree will not be granted during the same academic year in which the Bachelor's degree is granted.

The candidate must satisfy the Administrative Board that he has completed all the requirements specified by it for the degree. The purpose of this graduate course is to enable the student to pursue his professional study beyond the two years required for the bachelor's degree; to secure an opportunity to elect courses under the Faculty of Political Science; and to carry on special work in research in applied economics. Courses offered by the Faculties of Law, Political Science, and Engineering are open to the candidates for the degree under restrictions determined by those Faculties and by the Administrative Board of the School of Business.

*Candidacy for Degrees.* Students intending to apply for degrees must, on or before the dates indicated in the academic calendar, pay the required fee and file with the Registrar the application for graduation. In connection with the filing of the application for the degree of Bachelor of Science there must be filed also a certification of the student's proficiency in the foreign language of his choice.

*Advanced Standing.* Students in candidacy for the bachelor's degree who apply for admission to advanced standing, upon the basis of certificates of transfer from other colleges should fill out the appropriate application blank, to be obtained from the Secretary of the University, and file it with the University Committee on Admission before September 1 or January 1. Each candidate (whether he has a degree or not) must also present an official transcript of his academic record and a certificate of honorable

dismissal together with a marked catalogue of the institution that he leaves, showing the courses he has there pursued, with grades received in each.

*Scholarships.* A number of scholarships are open for competition in the School of Business. All scholarships are intended to be academic honors, and no student may hold more than one scholarship. Unless otherwise indicated, application for award for each year of incumbency must be made on or before May 1, on blanks furnished by the Secretary of the University. Failure to maintain a grade of at least C in all courses taken, or serious academic censure for any cause, will operate to vacate the scholarship before the beginning of the next Session. Vacancies may be filled and partial scholarship grants made at the discretion of the Committee.

*Admission to Advanced Standing.* In addition to the dental student's certificate mentioned above, based on at least two years of college work completed before beginning the study of dentistry, candidates who have completed, without conditions, one or two years of study in an accepted dental school will be given credit in the School of Dentistry for all courses satisfactorily completed therein, on presentation of proper certificates covering the same. Application blanks will be furnished on request, and prospective students are requested to file their applications early in June, when possible, to avoid delay in matriculating at the beginning of the session. Students seeking advanced standing will be rated in the class for which they have completed all the prerequisites.

Students will not be admitted to advanced standing upon examination, but only upon a satisfactory record from their schools of previous residence.

*Degrees.* The University will confer the degree of Bachelor of Science on students who complete the first two years of the course and the degree of Doctor of Dental Surgery at the completion of the four-year course.

*Combined Course, Columbia College.* Combined course for the degrees of A. B. and D. D. S. These courses cover the subjects of oral diagnosis including pathology, oral surgery, anesthesia, exodontia, plate prosthesis, dental ceramics, cast gold inlay, root canal technic, periodontia and removable bridgework.

Since 1916-1917 all students engaged in graduate study with Education as their subject of major interest, have been counted under the Faculty of Education only.

# UNIVERSITY EXTENSION

## ADMINISTRATIVE BOARD. (See page 10)

*General Statement.* The Statutes of the University define University Extension as "instruction given by University officers and under the administrative supervision and control of the University, either away from the University buildings or at the University, for the benefit of students unable to attend the regular courses of instruction."

*Students.* Courses in University Extension are planned for two classes of students: (1) men and women who can give only a portion of their time to study and who desire to pursue subjects included in a liberal education of the character and grade of a college or professional school, but without any reference to an academic degree; (2) those who look forward to qualifying themselves to obtain in the future academic recognition involving acceptance of the work which they may complete satisfactorily in University Extension.

*Courses of Instruction.* Under the direction of the University Council courses are offered in University Extension which count toward the degrees of Master of Arts and Doctor of Philosophy.

Regular courses of instruction are offered in University Extension which, in many instances, are coordinated so as to form at least the first years of collegiate and professional work, thus providing, in the evening at Morningside Heights and elsewhere, courses in subjects which are generally offered in the freshman, sophomore, and junior years of college, so that students may qualify themselves for admission with advanced standing to Columbia College and Barnard College or other institutions, as candidates for the degrees of Bachelor of Arts and Bachelor of Science.

There are also offered at Morningside Heights in the evening subjects which are required of students in the Schools of Mines, Engineering, and Chemistry, so that a student may pursue some special line of scientific study or prepare himself for advanced study in these schools. Courses in these schools are open only to those who have had a preliminary course of three years in Columbia College or the equivalent. This preliminary collegiate course may be taken in part or in full in University Extension in the evening by students engaged in business during the day.

Evening courses in architecture leading to a certificate are offered at Morningside Heights, which correspond to the courses of the Columbia University School of Architecture.

Evening classes in business, open as individual courses or forming a four-year series leading to a certificate and preparing for the State examination for the certificate of Certified Public Accountant are given at Morningside Heights.

A series of courses intended to equip students for the position of private secretary is also offered. A circular describing these courses will be mailed upon request.

Many courses are offered which aid a student to prepare for the Schools of Business, Dentistry, Law, and Medicine or to complete his preparation for Columbia College.

A two-year course in practical optics is offered in cooperation with the Department of Physics for the special training of those who expect to become optometrists.

Teachers College offers in cooperation with University Extension a number of technical courses in the various fields of Practical Arts: *i e.*, household arts, fine arts, industrial arts, music, physical training, and nursing and health. In many of the courses the instruction is the same as that given in the regular classes of the School

of Practical Arts. In other cases, special classes are organized to meet the needs of those desiring instruction in Practical Arts for use in the home.

Teachers College also offers to matriculated students in its School of Education a number of its regular courses at hours in the afternoons and on Saturday mornings which are convenient for teachers. These courses include work in the history and philosophy of education, educational administration and school supervision, educational psychology and measurements, rural education, vocational education, religious education, scouting and recreational leadership, secondary education, elementary education, kindergarten education, and certain courses on the methods of teaching academic subjects. A bulletin describing these afternoon, evening, and Saturday courses may be obtained from the Secretary of Teachers College.

Courses are offered in agriculture for those who desire special work in that subject.

Under University Extension are offered also a number of classes in dentistry. These include courses for practitioners, intended for graduates of reputable dental institutions. They are given at the College of Physicians and Surgeons, 59th Street and Tenth Avenue. In addition, classes in oral hygiene for licensed dental hygienists, designed to train women for the practice of operative dental hygiene, are offered at 437 West 59th Street.

A large number of other courses in varied subjects is given late in the afternoon and on Saturday, which repeat those in liberal studies offered in the schools of the University. These are given in the same manner and often by the same instructors as the regular courses. In most instances credit may be granted by the various schools of the University.

Six, eight and twelve week courses for qualified graduates in medicine are offered under University Extension at the College of Physicians and Surgeons, Presbyterian Hospital, Neurological Institute, Central and Neurological Hospital, Manhattan State Hospital on Ward's Island and at Stockbridge, Mass. These courses are described in a separate announcement.

Courses covering the first two years of collegiate study and supplying the preprofessional years of the Long Island College Hospital are given at that institution.

Numerous courses are given at various centers. These are either regular courses of collegiate grade or short lecture courses without academic credit.

Lecture-study courses in certain subjects forming fifteen or thirty lectures alternating with quiz or conference hours are given at Morningside Heights and at centers when requested.

Centers for the study of choral music are maintained at Morningside Heights, and Brooklyn, and choral concerts are given during the year.

*Home Study Courses.* Through University Extension, Home Study courses in a variety of subjects are offered for persons who are unable to attend classes conducted at the University. There are many individuals who, for many reasons, are compelled to postpone their academic work and who are very reluctant to drop it entirely. According to the University's policy of providing a liberal education for all who desire it, these courses have been instituted for the benefit of those who wish, even in this limited and restricted manner, to engage in advanced study.

The University, although it does not require previous academic work for admission to Home Study courses, asks each prospective registrant to give satisfactory indication that he or she can pursue further study to advantage, and prospective students are urged to enroll only in those courses for which previous study and training has prepared them and from which they may derive the greatest amount of pleasure and profit.

No academic credit is given for Home Study courses. Upon satisfactory completion of the work prescribed by the instructor, a certificate stating that definite work has been completed will be given by the Registrar of the University.

**Enrolment** in Home Study courses may begin at any time, but the Department reserves the right to limit the number or length of courses for which one individual may enroll.

All courses are outlined and carried out under the supervision and direction of members of the staff of one of the departments of the University.

In subjects which lend themselves to club study, arrangements can be made for pursuance of a course by the organization of a Home Study Club.

For information about individual courses or the organization of clubs address: Home Study Courses, 301 University Hall, Columbia University, New York.

A special circular describing the Home Study courses will be sent upon request.

**Registration.** Students who expect to attend at Morningside Heights are required to register at the office of the Registrar, University Hall. A student in University Extension registers for one session and is required to renew his registration in person at the beginning of the Spring Session.

Matriculated students in the various schools of the University will be allowed to attend courses in University Extension in accordance with the regulations of the several schools; they must, however, register and pay the fees in the same way as other students in Extension courses.

**Fees.** All students, matriculated or non-matriculated, admitted to Extension courses, must pay at the time of registration the fees determined by the Administrative Board. The fees for Extension courses are determined, as a rule, at the rate of \$8 per point, *i. e.*, for one hour per week of class-room work, or two hours of laboratory or drawing-room work, through one Session. All Extension students must pay a University fee of \$6 for each Session or any part thereof. Students taking six points each Session have the privileges of the Library and, in the case of men, the University Gymnasium.

**Dormitories.** The privilege of residence in the dormitories is limited in the case of University Extension men to students in good standing pursuing programs aggregating not less than twelve points each Session. All women students under twenty-four years of age who are not living at home are required to live in a dormitory, or to obtain permission to do otherwise from one of the Advisers of Women in University Extension.

**Degrees.** Courses in University Extension, approved by the Committee on Instruction in Columbia, Barnard, and Teachers Colleges are credited for matriculated students toward the degrees of A. B. and B. S. toward the diplomas in Teachers College, and toward degrees in other professional schools in accordance with the regulations established by the various faculties. The credit given for the various courses will be found in the *Announcement of University Extension*.

Courses in University Extension may also lead to the B. S. degree in general studies for students who obtain the approval of the Committee of the Council on University Undergraduates.

Courses in University Extension which have been approved by the Faculties of Political Science, Philosophy, and Pure Science and by the Executive Committee of the University Council may be counted in part fulfilment of the residence requirements for the degrees of Master of Arts and Doctor of Philosophy, subject to the rules governing these degrees as defined in the departmental announcements.

**Admission.** No examination is required for admission to courses offered in University Extension, but students must satisfy the instructors concerned that they can pursue the courses with advantage. It is expected that prospective students in all collegiate and professional courses shall have had a full secondary school education. The courses are open, unless it is otherwise stated, to both men and women.

**Location.** Intramural collegiate and professional courses are given at Columbia University. Extramural courses are given at the Long Island College Hospital, Henry

and Amity Streets, Brooklyn; Allentown, Pa., Bayonne, N. J., Bernardsville, N. J., Bridgeport, Conn., Brooklyn, N. Y., Elizabeth, N. J., Englewood, N. J., Irvington, N. J., Meriden, Conn., Morristown, N. J., New Britain, Conn., New Brunswick, N. J., New Rochelle, N. Y., Norristown, Pa., Paterson, N. J., Philadelphia, Pa., Scranton, Pa., Schenectady, N. Y., Stratford, Conn., Trenton, N. J., Washington, D. C., Waterbury, Conn., Westport, Conn., Yonkers, N. Y., and at centers where there may be sufficient demand. Classes are also conducted at the New York Chapter of the American Institute of Banking, 15 West 37th Street.

For detailed information as to the places and hours for these courses, the qualifications for admission, the regulations for registration, candidacy for degrees, diplomas, attendance, and examinations, the fees prescribed, and for a statement of each course offered, see the current *Announcement of University Extension*, which may be obtained without charge upon application to the Secretary of the University.

*Institute of Arts and Sciences.* The Institute of Arts and Sciences and the Home Study Courses form the non-academic division of the Department of University Extension. The aim of the Institute is to provide a popular late afternoon and evening program consisting of general lectures and events of a cultural nature.

The program is planned for busy men and women. The scope includes lectures, given singly or in series of six, on history, literature, art, music, geography, science, and on current economic and social problems; it comprises also illustrated travel lectures, dramatic recitals, and vocal and instrumental as well as chamber music concerts.

The annual dues are \$12.50 payable in advance, with an enrolment fee of \$5 payable only once provided the enrolment does not lapse.

With the exception of certain afternoon occasions, the admission ticket, which is transferable, admits two persons to the entire program of meetings. Altogether, the membership ticket includes free admission to approximately 225 lectures, readings, concerts, recitals, etc., throughout the season. The program continues from October to April. The University auditoriums are used. Memberships are accepted at any time and are good for one calendar year from the first of the month nearest the time of enrolment.

A special pamphlet describing in detail the program of the Institute will be mailed upon request.

# FELLOWSHIPS, SCHOLARSHIPS, AND OTHER PROVISION FOR THE ASSISTANCE AND REWARD OF STUDENTS

(For Awards see page 349)

NOTE: Unless otherwise provided, all stipends of Fellows and Scholars are paid in equal semi-annual instalments on the second Wednesday of each Winter and Spring Session. Before being entitled to receive the instalment of his stipend, each Fellow and Scholar is required to report himself in writing to the Registrar, as in residence, on or before the opening day of each Session. Failure so to report may operate to vacate the fellowship or scholarship.

Fellows and Scholars are required to pay the University, tuition, and degree fees, as they are prescribed by the Statutes.

## GENERAL REGULATIONS

The following regulations apply, unless the contrary is specifically stated, to the award of all fellowships and scholarships:

In each case application in writing, on a blank prepared for the purpose, must be filed with the Secretary of the University; for fellowships and University scholarships on or before March 1, for other scholarships on or before May 1. Applications and documents received in support thereof later than these dates, or not distinctly indicating the name of the candidate and the fellowship or scholarship for which he applies, may fail of consideration. As an evidence of graduation, a printed certificate is preferable to the formal diploma itself, as there is risk that the latter may be lost or injured in transit.

The appointment is in each case for one year dating from July 1. The fellowship or scholarship is not available for the Summer Session or in University Extension. It may be cancelled at any time if the student fails to maintain a satisfactory academic standard. Candidates will be notified as promptly as possible as to the success of their applications. If the applicant wishes the documents which he has submitted returned to him by mail he should enclose postage for the purpose. Documents will not be preserved for more than one year from the date of application.

Fellows and Scholars are required to register not later than the date specified in the University Calendar; failure to do so may be considered as vacating the fellowship or scholarship.

All Fellows and Scholars, except as hereinafter provided, shall reside in New York City or its vicinity during the academic year, unless permission be granted to study elsewhere. No University Fellow or University Scholar, as such, may pursue a professional or technical course of study during his term.

The conditions under which the appointment may be granted are indicated in the following paragraphs.

## UNIVERSITY FELLOWSHIPS

Twelve fellowships, known as 'University Fellowships,' are awarded annually by the University Council at its stated meeting in April to graduates of colleges and scientific schools who show themselves especially fitted to pursue courses of higher study and original investigation. The candidate must give evidence:

(a) Of a liberal education, such as a diploma from a college or scientific school of good repute;

(b) Of decided fitness for a special line of study, such as an example of some scientific or literary work already performed;

(c) Of upright character, such as a testimonial from some instructor.

Every University Fellow will receive an annual stipend of \$750. He will be required to pay the University and tuition fees prescribed by the Statutes.

A Fellow may be reappointed for reasons of weight, but not for more than two terms of one year each. Vacancies will be filled in the same manner in which original appointments are made.

These fellowships are awarded as honors, and those who are disposed, for the benefit of others or for any other reason, to waive the pecuniary emolument, may do so, and still have their names retained on the list of Fellows. In such cases additional University Fellows may be appointed. Each Fellow is expected to perform such duties as may be allotted to him in connection with a course of study leading to the degree of Doctor of Philosophy. He is expected to devote his time to the prosecution of special studies under the direction of the department of his major interest, and before the close of the academic year to give evidence of progress by the preparation of a thesis, the completion of a research, the delivery of a lecture, or by some other approved method. No Fellow shall be allowed to accept remunerative employment or to give instruction or assistance in any department of the University except by permission of the President, and the acceptance of any such employment, without such permission, shall operate to vacate the fellowship.

Fellowships, scholarships, and prizes awarded in Barnard College on the Barnard College foundation to students registered in that part of the University are contained in the Barnard College *Announcement* of the year. Fellowships, scholarships, and prizes awarded in Teachers College on the Teachers College foundation to students registered in that part of the University are contained in the Teachers College *Announcement* of the year.

#### SPECIAL FELLOWSHIPS

Unless otherwise specified, the regulations as to the mode of application for the following fellowships, and the conditions governing their award and tenure, are the same as those for University Fellowships. Candidates should indicate clearly upon their application blanks the fellowship for which they are applicants.

*Adams.* The Ernest Kempton Adams Research Fellowship, founded by Edward Dean Adams, in memory of his son, Ernest Kempton Adams, E.E., '97, A.M., '98, is awarded annually by the Trustees and may be renewed. The appointment may be made from among the teaching staff, alumni, or students of the University, or from among the distinguished physicists of the United States or of any foreign country. The incumbent is required to prosecute researches, either at Columbia University or elsewhere, in the physical sciences, or in their practical applications. The results of these investigations are published and distributed by the University under the title of 'Researches of the Ernest Kempton Adams Research Fellows of Columbia University.'

*Barnard.* The Barnard Fellowship for Encouraging Scientific Research, endowed by the bequest of the late President Barnard, is awarded by the University Council every third year beginning with 1918, upon the joint recommendation of the Faculties of Columbia College, Applied Science, and Pure Science to a graduate who, having shown decided aptness for physical investigation, is disposed to devote himself for some years continuously thereto. The Barnard Fellow receives the net income of the capital sum constituting the endowment of the Fellowship which shall accrue during three years. The appointment is for the term of one year. It is the duty of a Barnard Fellow

to devote himself to investigation in physical science under the direction of the Faculty of Pure Science. He will make a report certified to by the physicist superintending and directing him, giving an account of the work in which he has been engaged.

*Blumenthal.* The George Blumenthal, Jr., Fellowships for advanced study and research in medicine and surgery, are awarded each year by the University Council on the nomination of the Medical Faculty. The Fellows so appointed are entitled to receive annual stipends of not more than \$1000 each. No Fellow shall be reappointed for more than one year.

*Boring.* The Boring Fellowship in Architecture is open to graduates of the School of Architecture within the three years following their graduation and to all matriculated students in that School who have completed the requirements for the thesis as decided by the Administrative Board of the School. Such Fellowship is awarded every third year, beginning with the year 1925, conjointly with the Perkins Fellowship in Architecture, under regulations established by the Council. The holder of the Fellowship must devote the income thereof to foreign travel and study under the direction of the Administrative Board of the School of Architecture. # ALUMNI FEDERATION OF COLUMBIA UNIVERSITY

Incorporated 1916

The purposes of the Alumni Federation are to advance the interests and promote the welfare of Columbia University and its Alumni. This it endeavors to accomplish by encouraging and assisting efficient organization of Alumni bodies; by forming new associations and clubs; by disseminating among Alumni and the general public through an official publication or otherwise, accurate information about Alumni and University affairs; by providing a recognized channel of communication between students, Alumni, and University officers; by keeping the Alumni informed with respect to undergraduate life and activities; and by providing the machinery to nominate Alumni Trustees, and to collect the Annual Alumni Fund.

All members of the Alumni associations of the various schools maintained by the Trustees of the University are *ipso facto* School Members of the Federation, and any Alumnus may become a General Member. A payment of \$100, or a multiple thereof, toward the Endowment Fund entitles an Alumnus to be an Endowment Member, which carries life privileges and a life subscription to the *Alumni News*. The following are Endowment Members:

|                                         |                               |
|-----------------------------------------|-------------------------------|
| William Fellowes Morgan, '80, '84 Mines | John C. Richardson, '83 Mines |
| Henry Kraemer, '95 Mines                | George F. Butterworth, '74    |
| Nicholas Murray Butler, '82             | A. M. Huntington, '08 Hon.    |
| Willard V. King, '89                    | Norton Perkins, '01L          |
| Gano Dunn, '91 Mines                    | Herbert L. Satterlee, '83     |
| Edmund E. Wise, '83                     |                               |

There is a special class of Endowment Membership which provides for additions to the Endowment Fund of \$500 or over by individuals. An Alumnus thus contributing is named a 'fundor'. There has been one Fundor—Charles Elihu Slocum, '69 P. and S.—and his contribution to the Endowment Fund is known as 'The Charles Elihu Slocum, '69 P. and S. Alumni Federation Fund of Five Hundred Dollars'. A class may become a 'Fundor' upon payment of \$250. The Class of 1905 assigned to the Federation the income for one year of its Decennial Fund and was the first class to become a Fundor.

The Federation sets in motion the machinery which places in nomination before the University Trustees the candidates for Alumni Trusteeship. The Alumni Trustees in office in 1922 are: Herbert Livingston Satterlee, '83, '85L, '85Ph.D.; Walter B. James '83 P. and S.; Archibald Douglas, '96L; T. Ludlow Chrystie, '92; William J. Donovan, '05, '08L, and Walter Hull Aldridge, '87 Mines.

The Federation maintains an office in Room 311 East Hall which serves as a clearing house for all Alumni activities. It publishes the *Columbia Alumni News*, the official Alumni publication, and is the headquarters for the Columbia Alumni Fund.

This is a directory of all who have filed registration blanks.

For names and addresses of students not in Directory consult card index in Office of Registrar.

Where two addresses appear the first indicates the address during the academic year, the second the permanent home address.

In reading addresses, supply "New York City," when a street address only is given; supply "New York" when a town is given but no state; the usual abbreviations are used for all other states. The abbreviation for Street is omitted in the case of numbered streets above 9th.

The street addresses of the Residence Halls are as follows:
